## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

The management of SOF Connect AD presents its annual report and annual financial statements as at 31 December 2024, which are prepared in accordance with the International Financial Reporting Standards (IFRS) Accounting Standards, as adopted in the European Union (“IFRS Accounting Standards as adopted by the EU”).

### **General Information**

SOF Connect AD (the Company) was registered with the Commercial Register of the Republic of Bulgaria under UIC 206155179 on 7 July 2020. The seat and registered office of the Company is located at the Republic of Bulgaria, 1540 Sofia, 1 Christopher Columbus Blvd, Sofia Airport. The financial year of the Company ends on the 31<sup>st</sup> of December.

The main activity of the Company is: exploitation, maintenance, development and expansion of Sofia civil airport for public use in connection with a concession agreement dated 22 July 2020, signed between SOF Connect AD and the Ministry of Transport, Information Technology and Communications of the Republic of Bulgaria for the concession of Sofia Civil Airport – public state property. The awarded concession involves activities such as airport operator, airport administration and ground-handling operator; performance of commercial airport services, such as food and beverages, car parking, environmental and facility management and other airport services and activities related to the operation of Sofia Airport. The starting date of the concession is 19 April 2021 and the concession is for a period of 35 years.

SOF Connect AD focused mainly on achieving the international safety, security and quality of service standards, meeting the needs and expectations of various clients (airlines, service providers, passengers, citizens). The activity of airport administration involves the management, development, maintenance and operation of the airport infrastructure (construction works and capital expenditures necessary to build, repair or modernise Sofia Airport or part thereof).

### **Structure of the Share Capital**

The registered capital of the Company amounts to BGN 6,650,000 (six million six hundred and fifty thousand) divided into 2,550,000 (two million five hundred and fifty thousand) ordinary (Class A), registered shares with one vote each, each with nominal and issue value of BGN 1 (one) and 4,100,000 (four million and one hundred thousand) preferred (class B), registered shares with fifty-six votes each and a nominal value of BGN 1 (one) and an issue value of BGN 56 (fifty-six).

The Company has not declared or distributed dividends to its shareholders in 2024.

### **Management**

The members of the Management Board are elected for a term of three years. As at 31 December 2024, the members of the Management Board are:

- Jesús Caballero Pinto, Chief Executive Officer and Chairperson of the Management Board
- Stephane Vernede, Chief Financial Officer, and member of the Management Board
- Anelia Dimova, Chief Human Resources Officer, and member of the Management Board
- Juan Ramon Matas Sebastia, Chief Operations and Services Officer and member of the Management Board

The Company is represented by Jesús Caballero Pinto, Chief Executive Officer.

A Supervisory Board with a three-year term of office was also elected, which as at 31 December 2024 includes the following members:

- Thierry Déau
- Marco Rosso

**Financial Performance and Financial Position**

The concession agreement entered into force on 19 April 2021 and allowed the Company to commence generating revenue and cash flows from the exploitation of Sofia Airport. In 2024 the Company reported operating income in the amount of BGN 267,098 thousand (2023: BGN 224,554 thousand) and operating costs in the amount of BGN 147,884 thousand (2023: BGN 125,851 thousand). The result for the period is a net profit of BGN 20,012 thousand (2023: net profit BGN 2,988 thousand).

In 2024 EBITDA reached BGN 119,214 thousand (EBITDA margin of 45%), which is an improvement compared to 2023, when Sof Connect reported EBITDA of BGN 98,702 thousand (EBITDA margin of 44%).

EBT before revaluation of derivatives is BGN 32,091 thousand (2023: BGN 17,601 thousand). In 2024, Sof Connect realized a loss from revaluation of interest rate swaps of BGN 9,844 thousand (2023: loss of BGN 14,240 thousand). As a result, EBT after the revaluation of derivatives declined to BGN 22,247 thousand or 8.3% of Operating Income (2023: BGN 3,601 thousand or 1.5% Operating income).

As at 31 December 2024 the Company has recognised total assets in the amount of BGN 1,588,619 thousand (31 December 2023: BGN 1,396,650 thousand), including concession rights in the amount of BGN 1,064,149 thousand (31 December 2023: BGN 1,083,747 thousand) and capitalized expenses related to concession in the amount of BGN 37,477 thousand (31 December 2023: BGN 38,167 thousand). In addition, the Company has capitalized BGN 5,549 thousand related to the right of use of assets under IFRS 16 (31 December 2023: BGN 7,597 thousand). As of 31 December 2023 the company reported BGN 5,801 of unamortized bank fees related to the received bank loans. As of 31 December 2024, as result of the full disbursement of Facility 2 and Facility 3 all related bank fees have become part of the amortized cost of the respective facilities.

**SOF Connect AD****ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

The management of the Company exerts strict control over the operating costs to maintain the financial stability of the Company, as well as to timely and accurately service its liabilities to suppliers, creditors and related parties. The Company enjoys a strong liquidity position and all liabilities are being repaid timely. The policy of the Company is to maintain adequate liquidity to ensure all liabilities are timely met, will continue in 2025 and the Company does not anticipate any issues in this area.

The Company has secured bank loans in the amount of BGN 469 million and capital from the shareholders (including shareholders' loans) in the amount of BGN 469 million. As at 31 December 2024, the total amount of the committed bank loans and shareholder funds has been utilized and partially repaid.

The Company operates in Bulgaria and is exposed to several external risk factors – political, economic, social, technological, legal and those related to environmental protection. The management analyses and takes necessary measures to mitigate the impact of each of these factors.

Considering the consequences of the COVID-19 pandemic, as well as other factors and events such as the military conflicts in Ukraine and in the Middle East, the management of the Company has concluded that they do not create major uncertainty regarding the ability of the Company to continue its operations as a going concern. Furthermore, to maintain the economic balance of the concession in light of the detrimental consequences of COVID-19 on the airport's operations, in 2021 the Company and the Ministry of Transport and Communications signed an annex to the concession agreement in 2021, postponing the payment of the annual concession fees during the first ten years.

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

#### **Business development**

##### *Market environment – traffic*

###### **Reported traffic**

| <b>Period</b> | <b>Passengers</b> | <b>Flights</b> |
|---------------|-------------------|----------------|
| 2019          | 7,107,096         | 61,371         |
| 2020          | 2,937,846         | 35,954         |
| 2021          | 3,364,151         | 40,771         |
| 2022          | 6,003,653         | 53,722         |
| 2023          | 7,208,987         | 60,561         |
| 2024          | 7,922,702         | 65,764         |

The global spread of COVID-19 and its related restrictions halted the sustained growth in air traffic in recent years. The pandemic proved to be a huge challenge for the airlines and in 2020-2021 Sofia Airport reported enormous decline in passenger traffic and operated flights. Nevertheless, in 2023 traffic is recovered and reached 7,208,987 passengers and 60,651 flights, which is 1.4% growth and -1.3% reduction of 2019 levels, respectively. The positive trend continued in 2024 when the traffic reached 7,922,702 passengers and 65,764 flights, which is 11.5% growth and 7.2% growth of 2019 levels, respectively.

The low-cost airlines operating at Sofia Airport remain in a strong position, carrying more than half of the passengers in 2024 – 53%, and continuing to expand their markets within the continent by offering a more efficient and affordable services. Following the low-cost airlines, the leading airlines in terms of number of passengers carried are Bulgaria Air, Lufthansa, Austrian Airlines and Turkish Airlines.

The main competitors of Sofia Airport in terms of development of the air transport network are the airports in Athens, Belgrade, Bucharest and others in the region.

##### *Revenue*

SOF Connect reports several categories of revenue:

- Revenue from regulated aeronautical activities – revenue from airport charges;
- Revenue from non-regulated aeronautical activities – revenue from ground handling, cargo, de-icing services, transportation, storage and laboratory analysis of fuels, into-plane services, serving passengers with reduced mobility, etc.
- Revenue from non-aeronautical activities (commercial activities) – revenue from retail sales in stores, revenue from car parking, rental of areas and premises, revenue from advertising, revenue from guest and VIP lounge services.
- Revenue from construction works and equipment as a commitment under concession agreement.

In 2024, the Company's reported revenue from regulated aeronautical activities in the amount of BGN 144,314 thousand (54% of the total revenue) (2023: BGN 140,879 thousand or 63% of total revenue) followed by revenue from commercial activities – BGN 59,472 thousand (22%) (2023: BGN 44,901 thousand or 20% of total revenue), revenue from non-regulated aeronautical activities – BGN 31,223 thousand (12%) (2023: BGN 25,395 thousand or 11% of total revenue), revenue from construction works and equipment as a commitment under concession agreement in the amount of BGN 31,947 thousand (12%) (2023: BGN 13,040 thousand or 6% of total revenue)

## SOF Connect AD

### ANNUAL REPORT ON THE ACTIVITIES

For the year ended 31 December 2024

*Note:* Other revenue includes revenue from construction works and equipment as a commitment under the concession.

Since 1 January 2023 Sofia Airport introduced new regulated airport charges, which will be applied for the period 2023-2027, thus giving all airlines a long-term visibility regarding the level of regulated charges at Sofia Airport.

The largest share of the revenue from non-regulated aeronautical activities is realised from Fuel and De-Icing services, followed by the revenue from ground handling activities.

The ground handling activities on the territory of Sofia Airport are mainly carried out by three licensed operators – SOF Connect AD, Swissport Bulgaria AD and Goldair Handling Bulgaria Ltd. SOF Connect AD has the third largest share of serviced aircrafts for 2024 – 17.3% (2023: 20%).

**SOF Connect AD**  
**ANNUAL REPORT ON THE ACTIVITIES**  
For the year ended 31 December 2024

The largest share of the revenue from commercial activities in 2024 has been realised from rent of premises – 73% (2023: 67%) and from the operation of public car parking facilities – 13% (2023: 15%).

The rent of premises category includes rent of commercial outlets (duty-free and duty-paid stores, speciality shops, etc.), food & beverage premises as well as offices and warehouses. The duty-free / duty paid outlets account for the largest share of all rent revenues (42.6%), followed by food & beverage outlets (16.4%) and speciality shops (4.2%). SOF Connect works with reputable international operators, including Avolta (formerly Dufry), Lagardere Travel Retail and SSP. Avolta operates the duty-free/duty-paid retail outlets at the airport based on a 8.5 year retail subcontracting agreement signed in 2022, as well as several specialty shops. In April 2024, Avolta opened a brand new 1,733 sq.m. walk-through retail area, which is one of the largest and most modern travel retail store in Eastern Europe. Lagardere Travel Retail operates speciality shops, convenience stores as well as several F&B outlets at the airport. In August 2024, SOF Connect signed a long-term food & beverage service agreement with SSP, one of the largest international food and beverage operators, to develop and operate the new F&B area at Sofia Airport.

Working with established and well-known international companies is part of SOF Connect’s strategy to provide the best-in-class customer experience for passengers and airlines.

*Expenses*

The reported operating expenses of the Company for 2024, excluding depreciation and amortization charges, amount to BGN 147,884 thousand (2023: BGN 125,852 thousand). The structure of the operating expenses in 2024 is presented on the following graph:

Staff costs have the highest share (41%) (2023: 45%). The human factor is of great importance for SOF Connect AD and the Company strives to implement well-defined measures and programs in order to increase the professional competencies of the staff. Life-long learning is considered a key driver enabling successful development and the ability to innovate. In April 2023, the company signed a two-year collective labour agreement (CLA) with the labour unions operating at Sofia Airport.

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

Cost of goods sold in the amount of BGN 510 thousand (0.3%) (2023: BGN 982 thousand) (1%) represent the cost of de-icing fluid and fuels sold. Until April 2022, SOF Connect was operating the duty-free / duty paid retail outlets in house. In April 2022, this business was externalised through a long-term retail subcontracting agreement with Avolta (formerly Dufry).

The costs of hired services and materials amount to BGN 45,334 thousand (31%) (2023: BGN 47,307 thousand or 38%) and consist of costs of repairs, subscriptions and contract services, advertising and PR services, state fees, insurance premiums, utilities, and the cost of spare and other materials required for the maintenance of the Company's huge asset base.

The cost for construction of concession asset amount to BGN 31,947 thousand (22%) (2023: BGN 13,040 thousand or 10%)

#### **Investments under the Concession Agreement**

The company has committed to invest BGN 1,220.4 million over the term of the concession agreement, of which the committed investments for the first five years of the concession (2021-2025) amount to BGN 143 million. For 2024, SOF Connect AD reported a total of BGN 54,2 million (EUR 27.7 million) investments, comprising both of capital expenditures in public and private assets, advances to suppliers of non-current assets as well as current maintenance and repair works. The total implemented investments since the start of the concession up until 31 Dec 2024 amount to BGN 108.9 million (EUR 55.7 million) or 76% of the committed investments for the first five years of the concession.

The largest investments in 2024 include repairs of airfield infrastructure, upgrade of the apron lighting, concept design for Terminal 2 and Terminal 3 development, Terminal 2 renovations, incl. duty-free / duty-paid shops, new open air car parks, new organisation of Terminal 1 and Terminal 2 to facilitate the split between passengers to and from Schengen or Non-Schengen areas, new toilet block, Master Plan update, investments in the new operational equipment and vehicles (including fully electric vehicles). In addition, the Company continued to invest in upgrading its IT systems and infrastructure.

The investment program for 2025 will be focused on the terminal buildings (incl. design for Terminal 3), partial completion of the baggage handling system and security equipment, overhaul of the T2 multistorey covered car park, full rehabilitation of the fuel facilities, continuing improvement of the condition of the airfield infrastructure, upgrade of the apron lighting, optimising the operation split between Schengen and Non-Schengen passengers, implementation of overall advertising concept, initial works on the new Photovoltaic power plant, etc. In parallel, the process of digitalization will continue with several ongoing major ICT projects, such a new Enterprise Resource Planning (ERP) system, implementation of the Human Resource Management System (HRMS), and an Airport Operation Management System (AOMS) comprising several modules.

On a longer perspective, the Detailed zoning plan and Environmental impact assessment for the Terminal 3 development are ongoing and awaiting approval to facilitate the design of the Terminal 3 which will be completed in 2026.

#### **Environmental, Social and Governance**

In 2024, SOF Connect AD updated the Integrated Management System and was recertified in accordance with newest version of ISO Standards. The certificates for ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018 are valid until 19.05.2027. The Environmental and Social Management System is in line with the performance standards of financing institutions and the Concession Agreement. In 2024 SOF Connect AD digitalised the IMS as well as all internal regulations. All policies, procedures and company documents are organised by business unit and are accessible to all employees via the company Intranet.

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

SOF Connect AD issued its second comprehensive annual Sustainability Report in June 2024, aligned with the best global and industry practices that define the framework for Sofia Airport's social and environmental management. The company reported not only according to GRI standards, but the Sustainability Report 2024 included disclosures according to the new directive CSRD/ ESRS standards, EU Taxonomy and TCFD (for climate change risk assessment).

In June 2024, Sofia Airport achieved Level 4 -Transformation accreditation by ACI for carbon management and reduction, becoming the first Bulgarian airport to receive this recognition. The airport's strategic plan includes full decarbonization with 15% offsets by 2036, involving investments in electric vehicles, carbon offset programs, and renewable energy infrastructure.

In Q2 and Q3 2024 the street lighting in front of Terminal 2 and Terminal 3 was replaced with LED lighting. The technical design is ongoing for the reconstruction of Apron lights and the installation of LED lighting with a management system with delivery expected by December 2024. The design for the replacement of pier lighting has been completed, and the tender for implementation is ongoing. The replacement of lights in Terminal 2 main building is expected to start by end of October 2024. The project for the construction of first 5 MWp PV plant is ongoing with the tender published on the first week of October, Aeronautical study for Plot PV 5 was accepted from the Grantor, Bulatsa and CAA.

SOF Connect joined Sofia Municipality's Net Zero Cities initiative in September 2024, committing to reduce overall emissions in collaboration with other key stakeholders. Also, it continues implementing the three-year EU-funded "ESAGO Electrification of Sofia Airport Ground Operations" project, furthering its commitment to decarbonization.

SOF Connect, in partnership with A1 Bulgaria and WINGS ICT Solutions, started the implementation of a modern 5G network at Vasil Levski Sofia Airport for enhanced experience, efficiency, and security. Co-funded by the European Union under the Connecting Europe Facility.

In accordance with the ReFuelEU regulations, SOF Connect has commissioned SGS Germany GmbH to conduct an audit of the Fuel Farm. The objective of this audit is to ensure compliance with the ISCC EU and ISCC CORSIA standards. This initiative is a crucial component of SOF Connect's broader strategy aimed at reducing the environmental impact of aviation.

To commensurate the risks, the Company also undertook an Environmental Assessment of the initial Masterplan. In 2024 the Ministry of Transport and Communications approved the update of the initial Masterplan. Following discussions with the Ministry of Environment and Water (MoEW), SOF Connect discontinued the first EA procedure and resubmitted the updated Masterplan of Sofia Aripport to MoEW. Following and assessment MoEW confirmed on 02.04.2025 that a full Environmental Assessment is required.

In October 2024 SOF Connect submitted a Notification to the Ministry of Environment and Water about the investment proposal for construction of Terminal 3. In December 2024 MoEW approved the request from SOF Connect not to perform screening of the investment proposal and directly instructed the investor to prepare a Scoping Report and Public Consultations Scheme for the preparation of a full environmental impact assessment report.

ESG Division launched a waste management awareness campaign, which in 2024 included presentation of the waste management rules in the initial briefing for newly hired employees; Launch of an information campaign once a month with the publication of a waste newsletter; Preparation of a message related to recycling to be attached to Christmas gifts for employees.

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

In Q3 2024, the Permit for use of ground water was renewed by the Danube River Basin Directorate, which is a division of the Ministry of Environment and Water. The same quantity of ground water permitted for use is preserved, despite the reduction in consumption during the previous years. During the design of the new open car parking lots and the development of a concept design for Terminal 3 and its adjacent transportation centre, it was identified that the quantity of storm water to be discharged in the nearby Iskar River will increase and will possibly exceed the permitted quantity. Therefore, a renewal of the permit with the increased quantity of water will be needed during the construction of the new terminal.

The Corporate Stakeholder Engagement plan was updated in December 2024 and in addition a Project-Specific Stakeholder Engagement Plan was developed for the construction projects. The updates of the SEP and the project-specific SEP for Terminal 3 demonstrates the company's commitment to responsible planning with stakeholders. The collaboration with the Ministry of Environment and Water on the submission and approval of the updated Master Plan and ESIA (Environmental and Social Impact Assessment) procedures for building the new Terminal 3 demonstrates effective partnerships with governmental entities as well.

In terms of risk mitigation strategy for 2024, the identified ESG risks including through the Climate Change Impact and Risk Assessment, were updated and the implementation of mitigation measures was monitored. The identified hazards were included in the company's Risk Management System.

SOF Connect's Aviation Training Center was accredited by the Airports Council International (ACI), making it the only center in Bulgaria to offer ACI-certified training programs for aviation professionals worldwide. This milestone underscores SOF Connect's dedication to promoting education and professional advancement in the aviation industry.

SOF Connect displayed its dedication to social responsibility through a variety of engagements, including involvement in civic events such as the "Clean Bulgaria in One Day" volunteer day and support for the Aviation Veterans Club. Additionally, SOF Connect has organized exhibitions such as "Innocence without Borders" and "Fantastic Minds," which celebrate young Bulgarian scientific achievements. Furthermore, strategic alliances were formed with prestigious organizations such as the United Nations Global Compact and the Technical University of Sofia, resulting in mutually beneficial agreements aimed at promoting academic and professional development. SOF Connect's sponsorship of the renovation of the auditorium at the Technical University of Sofia and its active promotion of public transport use further underscores its dedication to community engagement.

In Q4 2024, SOF Connect collaborated with various partners to host the second annual Sofia AirCareer Port, which connected local job seekers with opportunities within the airport ecosystem. The company also organized the first-ever "Aviation-Event 2024 SOF" international aviation conference, which brought together over 200 industry leaders to discuss the integration of sustainability and digital transformation in airport operations.

SOF Connect is committed to promoting gender equality within the aviation sector. At the inaugural "Women in Aviation – Sustainable Development and Recruitment" conference, organized by BULATSA, it was emphasized that 38% of SOF Connect's employees are women, with 40% of management positions held by women. In alignment with this commitment, SOF Connect commemorated International Women's Day 2024 with a presentation on gender equality and an installation symbolizing zero tolerance for gender-based violence.

SOF Connect's commitment to sustainable and responsible procurement practices is underscored by its receipt of the "Gold Award for Procurement Digital Transformation 2024". Sofia Airport won the ACI 2024 "Best Airport in Europe" award for outstanding passenger experience.

SOF Connect is among the three highest-rated companies in the first edition of the ESGNews.bg competition "ESG Awards 2024". "Visionary for Sustainable Change" is the highest distinction in the competition. This award is given to companies that not only implement innovative sustainable strategies in their operations, but also inspire significant changes in the industry and society.

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

#### **Concession agreement**

On 22 July 2020 the Company concluded a concession agreement with the Ministry of Transport, Information Technology and Communications of the Republic of Bulgaria regarding the concession of Civil Airport Sofia – a public state ownership for 35 years term. The commencement date of the concession agreement was 19 April 2021. During 2024 the Company was following its obligations under the Concession agreement in the below areas:

- performed all associated functions of airport administration;
- reported BGN 54,140 thousand of implemented investments in 2024;
- submitted a concession fee certificate the Grantor, in accordance with which the annual concession fee for 2024 amounts to BGN 74,945 thousand (EUR 38,319 thousand);
- maintained a license for an airport operator, as well as additional licenses and permissions, related to the activities of an operator;
- maintained a Ground Handling Operator licenses according to article 48e paragraph 3, points 3-7 of the Civil Aviation Act;
- ensured that all Ground Handling Activities are provided at the Airport, with the activities being performed both directly by the Concessionaire and by Third Parties;
- employed technical and security officers to ensure the safety and the continuity of the operations;
- invested own capital in the form of shareholder equity and shareholder loans with balance sheet value as at 31 December 2024 in the amount of BGN 445,227 thousand (31 December 2023: BGN 375,616 thousand);
- provided a bank guarantee for construction works, based on the five-year investment plans, as well as performance guarantee, in accordance with the Concession Agreement;
- secured BGN 469 million of bank debt financing for the project, which has been fully utilized as at 31 December 2024 (31 December 2023: BGN 349.5 million);
- was compliant in fulfilling major part of its KPIs;
- followed obligations for vehicle fleet maintenance, security equipment maintenance, maintenance of buildings, installations and equipment;
- maintained insurance policies required by the Concession Agreement;
- obtained the Grantor's approval of the updated 5-year investment plan totalling EUR 73.1 million
- maintained a register of Movables required under Clause 6.2 of the Concession Agreement;
- applied, at its own expense, the principle of technology scouting to take advantage of any significant technical improvements or technological upgrades in connection with the Airport;
- carried out and ensured the availability of the Airport Activities and Airport Services in accordance with the Concession Agreement, increasing the competitiveness and quality of the Airport Services in strict compliance with international regulations and standards.

#### **Human resources**

The Company has 1,174 employees as of 31 December 2024 (31 December 2023: 1,238 employees).

The Company organizes professional training programs for the employees improving their competencies, management and technical skills, as well as aviation expertise. Total training expenses, including internally organized trainings, amount to BGN 707 KBGN (2023: BGN 677 thousand)

The Management of the company works in close collaboration with the three labour unions represented in the Company. The signed in 2023 2-year Collective Labor Agreement was applied; its term is until 30 June 2025.

During the year, the Company continued its restructuring and transformation process.

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

#### **Risk management**

The Company's activity is exposed to a number of risks, including price risk, currency risk, interest rate risk, credit risk and liquidity risk. The Company management monitors overall risks and implements measures to limit the possible negative effects of risks on its financial performance.

The financial risk management is performed by the Finance department of the Company. The department assesses and monitors financial risks in close collaboration with Management. The activities implemented to reduce financial risk aim at covering specific areas, such as price risk, currency risk, interest rate risk, credit risk and liquidity risk. In 2024, a risk policy, procedure and a risk management software were implemented as well as a training of the full management team of SOF Connect.

##### *Price risk*

The price risk is evaluated by Management in the context of expected future revenue from the operating activities of the Company.

One of the price risks for the Company is related to the unit level of airport charges, which in accordance with the Civil aviation act and the Regulation on airport charges for the use of public airports and air navigation services, are set at their cost-recovery levels. In case of appeals from airlines, the Regulatory authority - the Director General Civil Aviation Administration (DG CAA) - has the right to set the regulated airport charges application at a level that is different from the one proposed by the airport operator.

The regulated airport charges at Sofia Airport have been fixed for the period 2023-2027, thus substantially reducing the price risk related to regulated operations. This long-term pricing strategy provides long-term visibility on airport charges to airlines, and allows them to better plan their operations.

The Company faces price risk related to ground handling services prices. There are three main ground handling operators on the ground handling market at Sofia Airport, creating a highly competitive environment. At the same time the Company faces increasing cost of ground handling services due to the increase in prices of materials, electricity, fuels, consumables and labour. Furthermore, the Company's revenue from ground handling services is subject to concession fee under the Concession Agreement, which puts SOF Connect at a disadvantage compared to the other market players, which are not subject to such a requirement. SOF Connect has taken measures to reduce the losses by selectivity of the contracts and a special attention to cost optimization. This has resulted in reduction of SOF Connect's share in the ground-handling market from 20% in 2023 to 17.3% in 2024.

##### *Currency risk*

The Company performs a major part of its transactions related to purchases, sales and loans in BGN and EUR. Since the EUR and the BGN have a fixed exchange rate of EUR 1 for BGN 1.95583, the Company considers its exposure to currency risk as low. Only an insignificant part of the company's transactions is performed in other currencies.

|                                                  | 31 December 2024 |         |         |         | 31 December 2023 |         |         |         |
|--------------------------------------------------|------------------|---------|---------|---------|------------------|---------|---------|---------|
|                                                  | BGN'000          | EUR'000 | USD'000 | GBP'000 | BGN'000          | EUR'000 | USD'000 | GBP'000 |

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

#### *Interest risk*

The Company makes proper financial planning in relation with the loans it received. The loans from related parties bear a fixed interest rate and do not expose the Company to any interest rate risk. As the interest rate on bank loans comprises of a margin above EURIBOR, the Company uses interest rate swap contracts to hedge the risk of increase of the EURIBOR rate.

#### *Credit risk*

The credit risks to which the Company is exposed are related to incurring of financial losses due to a default by a client or a supplier, or bankruptcy of financial institutions in which the Company holds current accounts or from which it receives financing.

The Company trades only with established, creditworthy counterparties. Its policies are that all clients, who wish to trade on a deferred payment, are to be checked for creditworthiness. Additionally, the balance of the trade receivables is followed regularly, and any clients with overdue trade receivables are proactively requested to settle their debt (including through negotiating of deferred repayment plans). Where practical and feasible, the company requires advance payments or security deposits from clients with poor credit history. As a result of these measures, the exposure of the Company to doubtful trade receivables is relatively limited.

The main credit risk to which the Company is exposed is in relation to the current accounts and deposit accounts that SOF Connect's has opened in commercial banks. To manage the level of the credit risk, the Company works only with established banks with strong credit rating. At 31 December 2023, the current accounts and the short-term deposits of the Company are opened in banks with the following credit rating (according to Fitch Agency):

|        | BGN'000 | Credit rating |
|--------|---------|---------------|
| Bank 1 | 3,485   | BBB           |
| Bank 2 | 339,536 | BBB+          |

The maximum credit exposition of the Company as a result of the financial assets equals their carrying amounts as of 31 December 2024.

#### *Liquidity risk*

Liquidity risk is related to the inability of the Company to meet its obligations when they become due. To manage long-term liquidity risk, the Company has secured medium and long-term financing from banking institutions, as well as from its shareholders to cover its liabilities under the Concession agreement. The short-term liquidity risk is managed by daily monitoring of the current receivables and payables of the Company.

#### *Financial risk management in relation to Covid-19*

In 2024, both passengers and flight movements are above their 2019 level.. Nevertheless, the traffic volumes that were planned before the Covid-19 pandemic for the period 2020-2024 are far above the present levels, which means that even though traffic has recovered and even exceeded pre-pandemic levels, the negative effects from the pandemic continue to linger and impact on the Company's operations.

To cope with the effects of the pandemic, the Company undertook several measures, including restructuring of certain internal units and processes, monitoring of daily activities by the senior operations management, outsourcing or sub-contracting certain business activities.

In addition, the Company has signed an addendum to the Concession Agreement with the Ministry of Transport and Communications for the deferral of the annual concession fees for the first ten years of the concession, in order to restore the economic balance of the Concession.

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

#### *Capital management*

On 24 December 2020 the Company entered into an Equity Subscription, Subordination and Share Retention Agreement, concluded between the original shareholders and several banks as lenders of the project. The agreement was designed to ensure the achievement of the capital structure, required by the concession contract. Under the terms of the agreement, the shareholders committed to provide BGN 469 million to the Company in the form of capital and shareholders' loans. On 24 December 2020 the Company signed a Common Terms Agreement with certain banks as lenders and financial agents of the project. The Company attracted a total commitment of BGN 469 million in the form of investment loans from banks. The loan facilities were designed to ensure the fulfilment of the Company's financial commitments under the Concession Agreement. A short-term loan to finance the VAT on the up-front concession fee was also utilized by the Company in April 2021 and was successfully repaid later in that year.

As at 31 December 2024 the Company has not declared or distributed dividends.

#### *Operational risk*

On 23 December 2020 the Company signed a Technical Service Agreement with an experienced and reputable European airport operator. The airport operator provides advisory and other services to the Company in relation to the airport operations.

### **Main development goals**

The main strategic objectives of SOF Connect include:

- invest in modernizing and upgrading of the airport infrastructure and facilities;
- continuous improvement of the services offered to passengers and airlines by digitalizing, improving commercial facilities and increasing air connectivity to Sofia Airport;
- increase of operating profitability to a level comparable to that of the best-in-class airports in Europe;
- reduction of the carbon footprint of its operations and reaching a carbon-neutral status by 2036;
- contributing to the economic and social development of Sofia and Bulgaria.

In October 2022, the Company proposed an updated Five-Year Investment Plan to the Grantor, which the latter approved in June 2023. The updated version of the Five-Year Investment Plan provides greater detailing of the planned investments and allows reporting on the progress on a more detailed level. In November 2023, the Company provided further amendment of the Five-Year Investment Plan, which the Grantor's approved in November 2024. The total amount remains in line with the 2022 version of the Five-Year Investment Plan, namely BGN 143 million (EUR 73.1 million), however it reflects the actual progress of the investment projects addressing several amendments in the execution schedule and introducing new investment projects. The planned works included in the latest proposed revision of the Five-Year Investment Plan:

- replacement of the Baggage Handling System (BHS) in Terminal 2;
- execution of open air car parks for permanent use;
- extensive repairs to the Terminal 2 multi-story car park – which commencement is subject to completion of the open air car parks;
- extension and modernization of Terminal 2;
- refurbishment works to Terminals 1;
- repair works to the airfield (taxiways and apron);

## **SOF Connect AD**

### **ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

- procurement of new vehicles;
- repairs, upgrades and replacement of various equipment and infrastructure, including the fuel farm and the fuel unloading station, cargo building, charging stations, photovoltaic power plant, etc.
- various Information, Communication, Technology (ICT) systems and information infrastructure projects contributing to the Company' strategy for digitalization.

In 2024 Sofia Airport operated 84 scheduled destinations of 29 airlines and more than 30 charter destinations of 11 carriers (with more than 10 flights executed), predominantly internationally. SOF Connect works on expanding the map of offered destinations and already managed to add missing destinations from its route map. In this relation Sofia Airport has been connected with another two of the Baltic capital cities (Helsinki and Riga), French Alps region (Lyon) and the main city on Baden-Württemberg (Stuttgart). Salerno and Skiathos opened up new opportunities for travel and tourism. Air connectivity is among the key objectives of the airport management with focus on possibility to reach the whole world with a maximum of one stopover; direct flights from Sofia, with several potential destinations are currently developed, with both – legacy and low-cost airlines. The route development concept is based on 3 pillars:

- enhance the presence of legacy carriers with flights to all major European hubs;
- develop low-cost point-to-point traffic;
- increase charter flights to cater for the local tourism industry.

Forecasts of departing and arriving passengers, aircraft movements and air freight volumes provide the fundamental basis for the planning of the business development strategy at Sofia Airport. The traffic forecast has been prepared in consultation with the airlines that contributes the most for the Sofia Airport traffic. The total passenger numbers are forecasted to increase from 7.9 million in 2024 to 8.5 million in 2025, in line with the development plans of the Company.

The total aircraft movements are also projected to increase in 2025, reaching 67.6 thousand aircraft movements, compared to 65.8 thousand in 2024. This reflects airline expectations regarding continued up-gauging of aircraft and increased seat density and load factors.

The main carriers at Sofia Airport have announced their development plans for 2025. Ryanair is planning to resume operations to Tel Aviv and Wizz air will connect for very first time with regular flights Sofia with Alghero, Italy. In addition, Transavia France and EasyJet are up to start operations from Paris-Orly to Sofia. The charter market is also developing very fast, with Sofia Airport offering direct routes to exotic touristic destinations such as Thailand, Seychelles, Maldives, Dominican Republic, Sri Lanka, Tanzania and others.

#### **Events after the reporting date**

In March 2025, an amount of EUR 38.2 million has been released from the Ramp-Up Reserve Account. These funds have been used to repay the company loan obligations.

No other significant events have occurred between the reporting date and the date the financial statements have been issued.

#### **Responsibilities of the management**

According to the Bulgarian legislation, the management should prepare financial statements for each financial year that give a true and fair view of the financial position of the Company at the end of the year, as well as for the financial result and the change in the cash flows.

**SOF Connect AD****ANNUAL REPORT ON THE ACTIVITIES**

For the year ended 31 December 2024

The management confirms that the Company has applied consistently adequate accounting policies when preparing the financial statements as of 31 December 2024 and has made reasonable and prudent judgments, assumptions and estimates. The management also confirms that it has applied the IFRS Accounting Standards as adopted by the EU and that the financial statements are prepared under the going-concern principle.

The management is responsible for keeping of accounting books and records, for the effective and efficient asset management, and for undertaking of necessary measures for avoiding and discovering eventual misuses and other irregularities.

The management aims at developing a sustainable entity acting responsibly in respect of the environment and the health and welfare of its employees.

The Company has no equity traded on an equity market. No own equity was acquired during 2024. No equity transactions occurred between the Company and the members of the Management Board.

The Company has no branches.

The Company did not conduct any research and development activities throughout 2024.

The management confirms that any additional information requiring to be disclosed as per art. 39 of the Accountancy Act is not applicable for the Company.

Jesus Caballero Pinto  
CEO, Chairman of the Management Board

## INDEPENDENT AUDITOR'S REPORT

To the shareholders of "Sof Connect" AD

### REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

#### Opinion

We have audited the accompanying financial statements of "Sof Connect" AD (the Company), which comprise the statement of financial position as at December 31, 2024, and the statement of comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as adopted by the European Union (EU).

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) of the International Ethics Standards Board for Accountants (IESBA Code) together with the ethical requirements of the Independent Financial Audit and Assurance of Sustainability Reporting Act (IFAASRA) that are relevant to our audit of the financial statements in Bulgaria, and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code and the requirements of IFAASRA. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Information Other than the Financial Statements and Auditor's Report Thereon

The Management Board ("Management") is responsible for the other information. The other information comprises the annual report on the activities, prepared by the management in accordance with Chapter Seven of the Accountancy Act, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon, unless it is not specifically stated in our auditor's report and to the extent it is specifically stated.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

## **Responsibilities of Management and Those Charged with Governance for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Supervisory Board and the Audit Committee ("Those charged with governance") are responsible for overseeing the Company's financial reporting process.

## **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## **REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS**

### **Additional Matters Required to be Reported by the Accountancy Act**

In addition to our reporting responsibilities according to ISAs described in section *Information Other than the Financial Statements and Auditor's Report Thereon*, with respect to the annual report on the activities, we have also performed the procedures, together with the required under ISAs, in accordance with the Guidelines regarding new extended reports and communication by the auditor of the Professional Organization of Registered Auditors in Bulgaria - Institute of Certified Public Accountants (ICPA). These procedures include tests over the existence, form and content of the other information in order to assist us in forming an opinion as to whether the other information includes the disclosures and reporting as required by Chapter Seven of the Accountancy Act, applicable in Bulgaria.

### **Opinion under Art. 37, paragraph 6 of the Accountancy Act**

Based on the procedures performed, in our opinion:

- The information included in the annual report on the activities for the financial year for which the financial statements have been prepared, is consistent with the financial statements.
- The annual report on the activities has been prepared in accordance with the requirements of Chapter Seven of the Accountancy Act.

## **SOF Connect AD**

### **NOTES TO THE FINANCIAL STATEMENTS**

For the year ended 31 December 2024

#### **1. Corporate information**

**SOF Connect AD** (the Company) is registered on 7 July 2020 in the Bulgarian Commercial Register under company number (UIC) 206155179. The seat and registered address of the Company is at Republic of Bulgaria, Sofia 1540, Christopher Columbus Blvd. 1, Sofia Airport.

As of 31 December 2024, the Company is governed by a Management Board consisting of the following members:

- Jesus Caballero Pinto
- Stephane Vernede
- Anelia Dimova
- Juan Ramon Matas Sebastia

The Company is represented by Jesus Caballero Pinto, Chief Executive Officer.

The Company has a two-tier management system with a Supervisory Board consisting of the following members:

- Thierry Deau
- Marco Rosso
- David Delgado-Romero
- Guyve Sardari
- Philip Gounev
- Fadi Selwan
- David Feldman

The Shareholders in the Company, as of 31 December 2024 are:

- Meridiam Eastern Europe Investments SAS (MEEI) – 99,98%
- Meridiam Infrastructure Europe III SLP – 0,01%
- Meridiam Investments SAS – 0,01%

Strabag AG was a shareholder in the company unit 10 June 2022 (with a stake of 1.0%) when it sold its ownership stake to Meridiam Eastern Europe Investments SAS.

Information about the ultimate parent of the Company: Meridiam Infrastructure Europe III SLP, France – a partnership limited by shares is an investment fund, managed by Meridiam SAS, and as such, is subject to specific regulations and does not have any shareholders as such, but institutional investors. Furthermore, no individual/entity investor of Meridiam Infrastructure Europe III SLP holds a direct or indirect stake of 25% or more in total in SOF Connect AD.

The Company's scope of activities is as follows: exploitation, maintenance, development and expansion of Sofia civil airport for public use pursuant to a Concession agreement, dated 22 July 2020, signed between SOF Connect AD and the Ministry of Transport and Communications of the Republic of Bulgaria regarding the concession of Civil Airport Sofia – a public state ownership. The awarded concession includes performance of activities as an airport operator, airport administration and ground-handling operator; performance of commercial airport services; car-parking; environmental and facility management and other airport services and activities related to the operation of Sofia Airport.

The commencement date of the concession is 19 April 2021 and the term of the concession is 35 years.

The Company has 1,174 employees as of 31 December 2024 (31 December 2023: 1,238 employees).

#### **2.1. Basis for preparation**

The annual financial statements of the Company have been prepared in accordance with IFRS Accounting Standards as adopted by European Union ("IFRS Accounting Standards as adopted by EU"). The reporting framework "IFRS Accounting Standards as adopted by the EU" is substantially the approved national accounting basis International Accounting Standards (IAS) as adopted by the EU, regulated by the Accountancy Act and defined in item 8 of its Additional Provisions.

**NOTES TO THE FINANCIAL STATEMENTS**

For the year ended 31 December 2024

**2.1. Basis for preparation (continued)**

The annual financial statements have been prepared on a historical cost basis except for derivative instruments at fair value through profit or loss, retirement benefit obligations and concession liabilities carried at present value.

The annual financial statements are presented in Bulgarian lev and all amounts are rounded to the nearest thousand Bulgarian lev (BGN'000) unless otherwise specified.

The annual financial statements were prepared in accordance with the going concern assumption that the Company will continue to exist in the foreseeable future. 2021 was the first year after incorporation of the Company. It started its business and investment activities on 19 April 2021, pursuant to the signed concession agreement with the Ministry of Transport and Communications. The Company developed its financing plan for the concession by attracting capital from its shareholders and a consortium of banks during 2020 and the beginning of 2021. Thus, the funding requirements of the concession agreement were successfully fulfilled, and the Company commenced operations of Sofia Airport on 19 April 2021 (the concession commencement date).

COVID-19 was declared a global pandemic in March 2020 - before the Company's incorporation but after the Shareholders had submitted a binding bid for the Sofia Airport Concession project. The Shareholders assessed the impact of Covid-19 on the project and decided to continue with it. After the signing of the concession agreement, the severe negative effects of COVID-19 over the aviation industry exacerbated and it became apparent that the pandemic will have a lasting negative impact on the aviation industry. This triggered additional negotiations between the Company and the Ministry of Transport and Communications (the Grantor) regarding the economic balance of the concession, which has been significantly distorted by the pandemic. To restore the economic balance of the concession, on 9 April 2021 the Company and the Ministry of Transport and Communications signed an addendum to the Concession Agreement, with which the profile of the annual concession payments was changed.

In accordance with the signed Common Terms Agreement (CTA) between the Company and its lenders, the Company must comply with certain financial covenants as at any scheduled calculation date. As at the most recent scheduled calculation date (30 Dec 2024), the Company is in compliance with the financial covenants under the CTA. As a result of this, the ability of the Company to continue operating as a going concern is not impacted.

The preparation of the financial statements in accordance with IFRS requires management to make estimates and assumptions. The management relied on external professional expertise as well as own judgment to make certain assumptions when applying the accounting policy of the Company. The elements of the financial statements, the presentation of which requires greater judgment or complexity, as well as those elements, for which the estimates and assumptions used have significant influence on the financial statements as a whole, are further disclosed in note 3.

**2.2. Material accounting policy information****(a) Initial application of new amendments to the existing standards effective for the current reporting period**

The following amendments to the existing IFRS accounting standards issued by the International Accounting Standards Board (IASB) and adopted by the EU are effective for the current reporting period:

- **Amendments to IAS 1 Presentation of Financial Statements:** Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants (effective for annual periods beginning on or after January 1, 2024);
- **Amendments to IAS 7 and IFRS 7:** Supplier Finance Arrangements (effective for annual periods beginning on or after 1 January 2024);
- **Amendments to IFRS 16 Leases** - Lease Liability in a Sale and Leaseback (effective for annual periods beginning on or after 1 January 2024).

The adoption of the new amendments to the existing IFRS accounting standards has not led to any material changes in the Company's financial statements.

**(b) Standards and amendments to the existing standards issued by IASB and adopted by the EU but not yet effective**

At the date of authorisation of these financial statements, the following amendment to the existing IFRS accounting standards that has been issued by IASB and adopted by EU but is not yet effective has not been applied:

- **Amendments to IAS 21: The Effects of Changes in Foreign Exchange Rates** - Lack of Exchangeability (effective for annual periods beginning on or after 1 January 2025).

SOF Connect AD

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2024

2.2. Material accounting policy information (continued)

(c) New standards and amendments to the existing standards issued by IASB but not yet adopted by the EU

At present, IFRS accounting standards as adopted by the EU do not significantly differ from IFRS Accounting Standards adopted by the IASB except for the following new accounting standards and amendments to the existing accounting standards, which were not endorsed for use in EU as at the date of authorization of these financial statements (the effective dates stated below is for IFRS Accounting Standards as issued by IASB):

- **IFRS 18 - Presentation and Disclosures in Financial Statements** (effective for annual periods beginning on or after 1 January 2027);
- **IFRS 19 - Subsidiaries without Public Accountability: Disclosures** (effective for annual periods beginning on or after 1 January 2027);
- **Amendments to IFRS 9 and IFRS 7 - Amendments to the Classification and Measurement of Financial Instruments** (effective for annual periods beginning on or after 1 January 2026);
- **Amendments to IFRS 9 and IFRS 7 - Amendments to Contracts Referencing Nature-dependent Electricity** (effective for annual periods beginning on or after 1 January 2026);
- **Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7 - Annual Improvements to IFRS Accounting Standards - Volume 11** (effective for annual periods beginning on or after 1 January 2026);
- **IFRS 14 Regulatory Deferral Accounts** (effective for annual periods beginning on or after January 1, 2016) - the European Commission has decided not to launch the endorsement process of this interim standard and to wait for the final standard;
- **Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture and further amendments** (effective date deferred by IASB indefinitely but earlier application permitted). Endorsement process postponed indefinitely until the research project on the equity method has been concluded.

The Company anticipates that the adoption of these new accounting standards and amendments to the existing IFRS Accounting Standards will have no material impact on the financial statements of the Company in the period of initial application, except for IFRS 18 which is expected to have material impact on the presentation and disclosure of information in the financial statements. The Company is in process of analysing the specific impact of IFRS 18 on its financial statements.

Hedge accounting for a portfolio of financial assets and liabilities whose principles have not been adopted by the EU remains unregulated. According to the Company’s estimates, the application of hedge accounting to a portfolio of financial assets or liabilities pursuant to IAS 39 Financial Instruments - Recognition and Measurement would not significantly impact the financial statements, if applied as at the balance sheet date.

d) Foreign currency translation

The annual financial statements are presented in Bulgarian lev, as it is the functional currency and the currency of presentation of the Company.

Transactions in foreign currency are primarily reported in the functional currency at the exchange rate on the date of the transaction. The monetary assets and liabilities, denominated in foreign currencies are translated in the functional currency, at the end of each month at the closing exchange rate of the Bulgarian National Bank for the last day of the respective month. All exchange rate differences are recognized in the statement of comprehensive income. Non-monetary assets and liabilities evaluated at historical cost of acquisition in the foreign currency are converted in the functional currency at the date of the initial transaction (acquisition).

The Bulgarian lev (BGN) is fixed to the EURO as required by the Currency Board effective since January 1, 1999. The closing rate of the Bulgarian lev for the period of these financial statements, in relation to the main operational currencies of the Company, is as follows:

|             | 31.12.2024 | 31.12.2023 |
|-------------|------------|------------|
| 1 US Dollar | 1,88260    | 1,76998    |
| 1 Euro      | 1,95583    | 1,95583    |

e) Revenue recognition

The Company’s sources of revenues include:

- regulated aeronautical revenues (e.g. revenue from airport charges);
- non-regulated aeronautical revenues (e.g. ground handling revenues, cargo, fuel services, de-icing services, etc.);
- non-aeronautical (commercial) revenues – revenue from sale of goods, rental revenue, revenue from car parking services, advertising revenues, etc.;
- revenue related to construction or upgrade services according to concession agreement;
- other revenues.

**2.2. Material accounting policy information (continued)****e) Revenue recognition (continued)****Revenue recognition**

The Company recognizes the revenue when it fulfils its obligation to deliver the promised product (asset) or to provide the promised service to the customer. An asset is transferred when (or as) the customer has control over it.

For each performance obligation, the Company determines upon the entry into force of the contract whether it satisfies the performance obligation over time or satisfies the obligation to execute at a certain point in time. The Company recognizes revenue to reflect the transfer of promised goods or services to customers in an amount that reflects the consideration the Company expects to receive in return for those goods or services.

The Company applies a five-step model that assures compliance with the main principles of revenue recognition:

- Identify the contract(s) with a customer;
- Identify the performance obligations in the contract;
- Determine the transaction price;
- Allocate the transaction price to the performance obligations;
- Revenue recognition when (or as) the Company satisfies a performance obligation;

Aviation services (regulated and non-regulated) are provided by the Company within one day, which does not lead to differences in revenue recognition over the reporting period. Income and expenses related to the same transaction and/or event are recognized in the same period.

Incentives to customers (aviation companies) are reported as a reduction of revenue and are recognized by the Company in the period when related aviation services are provided.

The Company shall recognize revenue from non-aviation services during the period of their provision. The transaction price under non-aviation contracts with customers is determined on the basis of specifically agreed consideration and terms for each specific period. Parking revenues are recognized for each period of service provision.

Revenue under an operating lease agreement for terminal, office and warehouse areas and advertising positions shall be recognized on a straight-line basis over the term of the contract or under a contractual arrangement with specific lease payments for each specific period of the contract. Revenue from operating leases of terminal commercial areas are valued at the higher of agreed minimum guaranteed lease payments or agreed percentage from sales generated by lessees during reporting period.

Revenue is recognized when it is probable that the Company will collect the consideration to which it will be entitled in exchange for the goods or services that will be transferred to the customer. In evaluating whether collectability of an amount of consideration is probable, the Company considers the customer's ability and intention to pay that amount of consideration when it is due.

Revenue and costs related to construction or similar services under service concession agreement are recognized at the completion stage. The stage of completion is determined by analysing the completed work of each individual project. The treatment of this revenue is in accordance with IFRIC 12 Concession Services Agreements.

Revenues and costs related to equipment under service concession agreement are recognized at the moment when the Company delivers promised assets to the Grantor. The treatment of this revenue is in accordance with IFRIC 12 Concession Services Agreements.

**Contract balances****Contract assets**

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognized for the earned consideration that is conditional.

**Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section h) Financial instruments – initial recognition and subsequent measurement.

**Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs under the contract.

**2.2. Material accounting policy information (continued)**

**e) Revenue recognition (continued)**

*Deferred income*

Deferred income represents sales promotion charges collected by the Company from retail subcontractors. The accumulated funds can be used by the Company for funding various sales promotional activities at the airport. The Company recognizes income from promotional activities equal to the value of the recognized expenses for the promotional activities financed from the fund.

Deferred income also arises from capital investments performed by lessees that are not subject to reimbursement by the Company. Since lessees receive the right to use premises, the value of investments is considered part of the total rental payments under lease agreements. The value of investments is considered upfront rental payment which is recognized as rental income on a straight-line basis over the contract term.

*Cost to obtain a contract/ Contract performance costs*

Incremental costs to obtain a contract and certain contract performance costs may be recognized as an asset if certain criteria are met. Incremental costs of obtaining a contract are additional costs that would have not been incurred had the contract not been concluded. These capitalized contract costs should be depreciated on a systematic basis that is consistent with the Company's transfer of the related goods or services to the customer.

The Company has chosen to present contract costs related to the service concession agreement as part of the intangible assets in the statement of financial position, and the amortization on the line as the amortization of intangible assets within the scope of IAS 38 Intangible Assets.

Capitalized contract costs are reviewed for impairment at the end of each reporting period. Impairment losses are recognized in profit or loss.

**f) Finance income and finance costs**

Finance income comprises interest income on funds invested. Interest income is recognised as it accrues in profit or loss, using the effective interest method.

Finance costs comprise interest expense on borrowings and unwinding of the discount on provisions and contingent consideration.

Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest rate method.

Borrowing costs that can be directly attributable to the acquisition, construction or production of a qualifying asset are those borrowing costs that would be avoided if the expenditure on the qualifying asset had not been made. These costs are capitalized in the value of the asset.

Foreign currency gains and losses are reported on a net basis.

**g) Taxes**

*Current tax*

Current tax assets and liabilities for the current and previous periods are recognized at the value expected to be recovered or paid to the tax authorities. When calculating the current taxes, the tax rates and laws applied, are the ones already in force or the ones that have been accepted to a significant degree at the respective date. The management analyses the corporate income tax (CIT) return positions, where tax laws are subject to interpretation, and recognizes provisions, when it is appropriate.

Current taxes are directly recognized in the equity (not in the statement of comprehensive income) when the tax relates to items being directly accounted into the equity section.

*Deferred tax*

Deferred taxes are recognized as described below for all temporary differences at the reporting date, arising between the tax base of the assets and liabilities and their carrying amounts.

Deferred tax liabilities are recognized for all taxable temporary differences except to those emerging from the initial recognition of an asset or a liability of a given deal, which is not a business combination and does not affect the accounting profit, or the tax profit or loss at the moment of the transaction.

Deferred tax assets are recognized for all deductible temporary differences, transferred unused tax credits and unused tax losses, to the extent, that it is probable for a taxable profit to be present for transferred tax credits and unused tax losses to be utilized against, unless the deferred tax asset originates from the initial recognition of an asset or liability from a given deal, which is not a business combination and does not affect the accounting profit, or the tax profit or loss at the moment of completion of the deal.

**2.2. Material accounting policy information (continued)****g) Taxes (continued)**

The Company performs a review of the carrying amount of the deferred tax assets at every reporting date and reduces it to the extent, to which it is no longer probable for a sufficient taxable profit to be realized, allowing the entirety, or a part of the deferred tax asset to be recovered. The unrecognized deferred tax assets are reviewed at every reporting date and are recognized to the degree, to which it has become probable for a future taxable profit to be realized, allowing for the deferred tax asset to be restored.

Deferred tax assets and liabilities are evaluated according to the tax rates, expected to be in force during the period when the asset is realized or the liability is settled, based on the tax rates (and tax laws) in force or have come in force to a sufficient degree at the reporting date.

Deferred taxes, linked with positions, recognized outside the profit and loss, are recognized outside the profit and loss. Deferred taxes are recognized depending on the transaction linked to them in the other comprehensive income, or directly in the equity.

The Company compensates deferred tax assets and liabilities only when there is a lawful right to deduct current deferred tax assets against current tax liabilities and the deferred tax assets and liabilities refer to taxes on income, imposed from the same tax authority for the same taxable entity.

**h) Financial instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

***Financial assets******Initial recognition and measurement***

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under IFRS 15.

In order a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Financial assets at fair value through profit or loss include: financial assets designated upon their initial recognition as "at fair value through profit or loss", or financial assets for which a mandatory requirement exists to be measured at fair value. Derivatives, including individual embedded derivatives, are also classified as held for trading, unless they have been designated as effective hedging instruments.

Irrespective of the criteria for debt instruments which should be classified at amortised cost or at fair value through other comprehensive income as described above, debt instruments may be designated as "at fair value through profit or loss" upon their initial recognition, if this would eliminate or reduce a significant accounting mismatch.

Financial assets at fair value through profit or loss are measured in the statement of financial position at fair value, with net changes in the fair value recognised in profit or loss within finance income or finance costs.

This category includes derivative instruments. A derivative embedded in a hybrid contract containing a host that is financial liability or a non-financial item is separated from the host and accounted for as a separate instrument, if: the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value, and changes therein are recognised in profit or loss. Remeasurement is only done if there is either a change in the contractual conditions that materially modifies the cash flows that would otherwise be required, or if there is reclassification of a financial asset outside the category of fair value through profit or loss.

A derivative embedded in a hybrid contract whose host is a financial asset is not accounted for separately. The requirement is the host – financial asset, together with the embedded derivative, to be classified in its entirety as a financial asset at fair value through profit or loss.

**2.2. Material accounting policy information (continued)**

**h) Financial instruments (continued)**

***Subsequent measurement***

***Financial assets at amortized cost***

This category is the most relevant to the Company. The Company measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows, and;
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Company's financial assets at amortized cost include trade receivables and cash in bank accounts (current and deposit).

***Derecognition***

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognized (i.e., removed from the Company's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or,
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

***Impairment of financial assets***

The Company recognizes an allowance for expected credit losses (ECLs) for all financial assets at amortized cost. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade receivables and contract assets, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Company believes that the possible loss within trade receivables that could be considered for impairment are reasonably covered with the current estimate created. Changes in external factors such as the economic environment, could affect the Company's estimates. If the client's financial performance deteriorates, the future actual losses could be higher than projected.

The Company considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written-off when there is no reasonable expectation of recovering the contractual cash flows.

**2.2. Material accounting policy information (continued)**

**h) Financial instruments (continued)**

***Financial liabilities***

***Initial recognition and measurement***

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables as well as loans from related parties, bank borrowings, concession fee liabilities and lease liabilities.

***Subsequent measurement***

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IFRS 9.

Gains or losses on liabilities held for trading are recognized in the statement of profit or loss.

***Loans from related parties and bank borrowings***

All loans and other borrowings are initially recognised at fair value of the consideration received on the transaction, netted of the direct costs related to these loans and borrowings.

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method.

The amortised cost is calculated by taking into consideration all types of charges, commissions and other costs, including any discount or premium associated with these loans. Amortisation is recognised in profit or loss as finance costs in the statement of comprehensive income.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur.

Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

***Derecognition***

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

At the inception of the transaction the Company documentary supports the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Company supports by documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items.

**SOF Connect AD**  
**NOTES TO THE FINANCIAL STATEMENTS**

For the year ended 31 December 2024

**2.2. Material accounting policy information (continued)**

**i) Property, plant and equipment**

Property, plant and equipment are recognized if it is probable that future economic benefits associated with the asset will flow to the Company and if the cost of the asset to the Company can be measured reliably.

Items of property, plant and equipment (tangible assets) are measured at cost less accumulated depreciation and any accumulated impairment losses. The cost may include cost of materials and direct labor, any other costs, attributable to bringing the asset to its working conditions, costs of dismantling and removing items and restoring the site as well as borrowing costs.

Property, plant and equipment also include movable assets not controlled by the Grantor but necessary for operation of the concession, such as vehicles and other equipment. While these assets are necessary for the performance of the Company’s day-to-day operations, since they are not connected to the concession site, they remain in ownership of the Company throughout the concession period.

The moment when the asset is capitalized is the moment when the asset is ready to be used for its operation in a manner provided by the management.

Subsequently to their initial recognition Property, plant and equipment are measured by the Company at their historical cost less accumulated depreciation and impairment losses.

The costs of daily maintenance of the asset are recognized as operational expenditure when they are incurred. They do not increase the balance sheet value of the asset. Such non-capitalizable costs include labor costs for eliminating malfunctions, costs for small spare parts, costs related to return the asset into service, etc.

Depreciation is charged to allocate the cost of assets less their residual values over their estimated useful lives (the period when the asset is expected to be used), using the straight-line method. The following annual rates are typically used for the depreciation of property, plant and equipment:

|                                  |  |              |
|----------------------------------|--|--------------|
| Machinery and equipment          |  | 5 - 10 years |
| Computers and office equipment   |  | 2 -5 years   |
| Vehicles                         |  | 5 -10 years  |
| Office and public area furniture |  | 2 - 20 years |

If there is an indication that there has been a significant change in the useful life or residual value of an asset, the depreciation of that asset is revised prospectively to reflect the new expectations.

The gain or loss on disposal or during sales of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of the property, plant and equipment, and is recognized net within other income/other expenses in profit or loss.

The Company recognizes individual assets and sub-assets based on general criteria and principles reflected in IAS 16. If a major asset or complex of assets can be properly identified by individual elements, they are recorded as sub-assets. In case a complex of assets has different life expectancy, each sub-asset is amortized according to their expected useful life.

Costs for restoration, replacement or modernization of obsolete or out-of-use fixed assets incl. major repairs, reconstructions and asset improvements that increase the efficiency or useful life of the assets are recognized as an increase in the value of the asset. All costs related to an improvement that leads to an economic benefit over the initial functional and technical efficiency of the asset are recognized as an asset when the result of their implementation is:

- functional new quality
- independent life of the result of the expenditure incurred
- increased productivity
- improved safety
- improved environmental impact
- improved product quality
- reduced operating costs.

Current maintenance and repairs are recognized as costs because they partially or completely restore lost operational qualities of assets.

**2.2. Material accounting policy information (continued)****j) Intangible assets**

Intangible assets are identifiable non-monetary assets without physical substance that are identifiable (either by being separable or arising from contractual or other legal rights). An intangible asset is identifiable if it is capable of being separated or divided from the entity and sold, transferred, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, or if it arises from contractual or other legal rights. Furthermore, to qualify for recognition an intangible asset must be controlled by the Company because of a past event, and the Company should expect to receive future economic benefits from the asset.

Intangible assets are initially measured at cost including the purchase price, all costs directly attributable to the acquisition of the asset, and non-recoverable taxes and fees and borrowing costs. Subsequent measurement is at fair value less accumulated amortization and impairment loss.

Subsequent costs are added to the asset's carrying amount or accounted for as a separate asset only when the Company is expected to receive future economic benefits associated with the use of that asset and when its carrying amount can be reliably determined. All other maintenance and repair costs are recognized in profit or loss for the year in which they are incurred.

***Concession rights capitalized expenses related to concession***

Airport infrastructure and other assets received by the Company under the concluded Concession Agreement are accounted in accordance with IFRIC 12 Concession Service Agreement. The Company recognizes intangible assets related to service concession agreement when it obtains the right to collect revenues from the operation of the concession infrastructure.

The Company is a party to a Concession Agreement with the Ministry of Transport and Communications, in accordance with which the Company has obtained the right to operate, maintain, upgrade and develop Sofia International Airport, a state-owned asset. The Company has been granted the right to charge the users of the Airport for using the existing state-owned infrastructure as well as the new state-owned assets that the Company constructs or upgrades in accordance with the Concession Agreement. The Ministry of Transport and Communications, as Grantor, controls and regulates that services that the Company provides to end users. Furthermore, the grantor controls any significant residual interest in the assets at the end of the Concession Agreement.

The concession rights have been initially measured as the sum of the upfront concession fee paid by the Company to the Grantor upon the commencement of the concession agreement plus the present value of the minimum annual concession fees payable over the term of the Concession Agreement, discounted at the rate of the applicable project cost.

In addition, the Company has capitalized certain expenses related to fulfilling the conditions for the commencement of the Concession. These expenses comprise various legal, advisory and other fees that the Company incurred and that are directly attributable to Concession Agreement. These costs have been recognized as an intangible asset.

The concession rights and the capitalized expenses related to the Concession Agreement are amortized using the units of production method based on passenger traffic over the term of the Concession Agreement. Management believes that this method most accurately reflects the consumption of the economic benefits from the concession rights and the capitalized expenses since passenger traffic is the single most important revenue driver for the airport.

The amortization rate for a given year is calculated by dividing the actual passenger traffic for that year by sum of the total passenger traffic over the term of the concession (April 2021 – April 2056). Therefore, this amortization method requires the use of forecast traffic data over the term of the concession, which are prepared by an independent professional traffic advisor, using a reliable and industry-recognized traffic forecast methodology.

Management reviews the actual traffic on a daily, weekly, monthly and quarterly basis and compares it to the forecast data. If substantial deviations between the actual and the forecast passenger numbers are identified, the Company commissions a new independent traffic forecast.

The intangible assets are tested for impairment at the end of each reporting period. If the carrying value of the intangible assets exceeds the value of the intangible asset calculated by discounting the expected future free cash flows attributable to the asset at an appropriate discount rate, then the net book value is reduced accordingly, and an impairment expense is recognized in the statement of comprehensive income.

**2.2. Material accounting policy information (continued)****j) Intangible assets (continued)*****Concession intangible assets***

In accordance with the Concession Agreement, the Company has the obligation to upgrade and modernize the existing public infrastructure or invest in new public infrastructure at the airport. The ownership title on the new investments related to public infrastructure, that qualify for recognition as non-current assets, automatically passes on to the Grantor when the assets are completed and become available for use. In accordance with the Concession Agreement, the Company obtains the right to use the public assets over the remaining term of the Concession Agreement. This right of use is recognized as an intangible asset under IAS 38 Intangible assets at the moment the underlying public infrastructure becomes available for use.

The intangible assets related to right of use of newly constructed state assets are initially measured at the cost of the acquiring the underlying public asset in the period in which costs are incurred. The cost includes purchase price, any non-refundable taxes and duties, and all directly attributable costs of bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management, including borrowing costs. If the Company has an obligation to dismantle and remove the asset and restore the site on which it is located, the estimated costs related to the dismantling of the asset and the restoration of the site are included in the initial cost of the asset.

Subsequently, the intangible assets related to rights of use of state assets are measured at cost less accumulated amortization charges and impairment losses (if any).

Rights of use related to newly developed state assets are amortized using the unit of production method based on passenger traffic (as outlined above), to the extent that the expected consumption of the economic benefits from the usage of the state asset is linked to passenger traffic. When the consumption of the economic benefits from the rights of use is not linked to passenger traffic, or when the consumption pattern cannot be reliably estimated, the rights of use are amortized over their useful life using the straight-line method of amortization. Useful lives are determined to be equal to the shorter of the useful life of the underlying public tangible asset or the remaining term of the concession.

***Other intangible assets***

Other intangible assets are initially measured at historical cost. These intangible assets may have a finite or infinite useful life and subsequently are measured at historical value less accumulated amortization, less accumulated impairment.

The amortization is calculated using the straight-line method to allocate the cost of licences over their estimated useful life. Perpetual licenses where the Company pays annual fee for renewal are expensed on a systematic basis, considering the annual term as well as the amortization method adopted for expense recognition.

A non-current intangible asset is written off when it is sold or when no future economic benefits are expected from its use or disposal. Gains or losses arising on the write-off of the asset (representing the difference between the net proceeds from sale, if any, and the carrying amount of the asset) are included in the statement of comprehensive income when the asset is derecognized.

At the end of each financial year, the residual values, the expiration date, and the amortization methods of assets are reviewed and, if expectations differ from previous estimates, they are revised in future periods.

**k) Leasing**

Contracts for transfer of rights to the Company for use of a particular asset for a specified period for consideration are treated as leases, in accordance with IFRS 16 Leasing.

Airport infrastructure and other assets received by the Company under the Concession Agreement are treated in accordance with IFRIC 12 Service Concession Agreement.

**2.2. Material accounting policy information (continued)****k) Leasing (continued)***The Company as a lessee*

Contracts where the Company is granted the right to control a specific asset for an agreed period of time are classified as a lease.

Upon entry into force of a leasing contract, the Company recognizes an asset with a right of use and an obligation under a lease. As of the commencement date, the eligible assets are recognized at the present value of the minimum lease payments plus any contingencies that are paid or the fair value of the leased asset, if that value is lower. Subsequently, the assets with right of use are measured at cost less any accumulated depreciation and any accumulated impairment losses and are adjusted for any revaluation of the lease liability due to a revaluation or change in the lease. Assets with right of use are amortized on a straight-line basis over the shorter of the useful life of the asset or the lease term. Impairment losses are recognized in the carrying amount of an asset with right of use.

The lease obligations are recognized at the beginning of the contract at the present value of the lease payments not paid at that date. Each lease payment is apportioned between the lease liability and the financial cost. Financial expenses are booked in profit or loss during the lease term, so that a constant periodic interest is payable on the balance of the liability for each period. Subsequently, the lease liabilities are measured using the effective interest method.

*The Company as a lessor*

In the case of a leasing contract where the Company is the lessor of the assets, the subject of the contract is recognized in the statement of financial position and the present value of the lease payments is presented as a receivable. Interest revenues are recognized in the statement of comprehensive income. The difference between the lease payment and interest revenues reduces the lease receivable without affecting income.

In the case of leases where the Company is the lessor, the lease payments are recognized on a straight-line basis over the term of the lease as operating leases revenue, depending on the terms of the concluded contract - by the linear method for the term of the contract or other systematically agreed base.

The lease asset continues to be capitalized in the form of property, plant and equipment at acquisition cost and is amortized on a straight-line basis in accordance with the Company's accounting policy for the respective asset.

**l) Impairment of non-financial assets**

At every reporting date, the Company evaluates whether there are any indications of impairment of an asset. In the case of such indications or when an annual test for impairment is required, the Company sets the recoverable value of this asset. The recoverable value is the higher of the fair value, reduced by the expenses for sale of the asset or object generating cash flows and its value in use. The recoverable value is determined for a separate asset, except in the case that during its use no cash flows are generated which are significantly different from those generated by other assets or groups of assets. When the carrying amount of a given asset or object generating cash flows is higher than its recoverable value, it is considered to be impaired and its carrying amount is reduced to its recoverable value.

When determining the value in use, the expected future cash flows are discounted to their current value by using a norm for discounting before taxes, reflecting the current market evaluation of the value of the money at the time and the specific risks for the asset.

The fair value less costs to sell is defined on the basis of recent market deals, if there are such. If no such deals can be identified, an appropriate model for identification is applied. The calculation carried out is confirmed using other models for evaluation or other present sources of information for the fair value of an asset or object, generating cash flows.

Impairment losses are recognized as other operating expenses in the statement of comprehensive income.

At every reporting date, the Company decides if there are indications that the impairment loss of an asset, recognized in previous periods might have decrease or no longer exist. If such indicators exist, the Company determines the recoverable amount of the asset or the object, generating cash flows. The impairment loss is reversed only when there is a change in the approximate evaluations used in the determination of the recoverable value of the asset, after the recognition of the last impairment loss. The recovery of the impairment loss is limited, so that the carrying amount of the asset does not exceed its recoverable value, nor should it exceed its carrying amount (after subtracting the amortization), which would be defined, if there was no recognized impairment loss in the previous years. The recovery of impairment loss is recognized in the report for the comprehensive income.

**2.2. Material accounting policy information (continued)**

**m) Inventories**

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted-average cost method for materials and goods, except for the cost of fuels where first in – first out method is adopted related to legal requirements. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

**n) Cash and cash equivalents**

Cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

For the purpose of presentation in the statement of cash flows cash receipts and payments on behalf of customers, where these reflect the activities of the customer are netted against each other.

Cash outflows related to concession intangible assets, including advance payments to suppliers of construction and upgrade services, are presented within investing activities in the statement of cash flows.

Restricted cash includes guarantee deposits subject to restrictions and therefore not available for general use by the Company. These are presented under other receivables in the statement of financial position.

**o) Employee benefits**

*Defined Contribution Plans*

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Government of Bulgaria is responsible for providing pensions in Bulgaria under a defined contribution pension plan. Termination benefits for voluntary redundancies are recognized as an expense if the Company has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting date, then they are discounted to their present value.

*Defined Benefit Plans*

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value.

The Company has obligation to pay certain amounts to each employee who retires with the Company in accordance with Art. 222, § 3 of the Labour Code (LC) of the Republic of Bulgaria and with the Collective Labour Agreement in effect as of the reporting period end-date. When a labour contract of a Company's employee, who has acquired a pension right, is terminated, the Company owes a compensation amounted to two gross monthly salaries. In case the employee's length of service in the Company equals to or is greater than 10 years and not more than 20 years as at retirement date, then the compensation amounts to nine gross monthly salaries, for length of service more than 20 years, the compensation amounts to thirteen the gross monthly salaries. As at balance sheet date, the Management of the Company estimates the approximate amount of the potential expenditures for every employee based on a calculation performed by a qualified actuary using the projected unit credit method.

The estimated amount of the obligation and the main assumptions, on the base of which the estimation of the obligation has been made, is disclosed to the financial statements in Note 3.

Actuarial gains and losses arising from adjustments to the length of service and changes in actuarial assumptions are recognized in equity in the statement of comprehensive income for the period in which they arise.

**2.2. Material accounting policy information (continued)****o) Employee benefits (continued)***Termination Benefits*

Termination benefits are recognized as an expense when the Company is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if the Company has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, then they are discounted to their present value.

*Short-term employee benefits*

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

The Company recognizes as a liability the undiscounted amount of the estimated costs related to annual leave expected to be paid in exchange for the employee's service for the period completed.

**p) Provisions**

Provisions are recognized when the Company has a current obligation (legal or contractual) as a result of past events, when there is a probability that a cash flow, including economic benefits would be required to settle the obligation and when a reliable evaluation of the obligation can be made. When the Company expects that some or all expenses necessary for settling the expenses of the provisions can be reversed, for example under an insurance contract, the recovery is recognized as a separate asset, but only when it is practically for sure that these expenses will be reversed. The expenses for the provision are presented in the report of comprehensive income, net of the sum of the reversed expenses. When the effect of the time differences in the value of the money is significant, the provisions are discounted using a current norm concerning discounting before taxes, which reflects, whenever appropriate, the specific risks for the obligation. When discounting is used, the increase of the provision, in result of the time that has passed by, is presented as a financial expense.

**q) Expenses recognition**

Operating expenses are recognized as they are incurred, following the accrual and matching concepts.

Financial costs are recorded in the profit or loss for the period when incurred and comprise of interest expense, using the effective interest method, including bank charges and other direct expenses on loans and bank guarantees, and exchange differences.

**r) Share capital**

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds.

**s) Government grants**

Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate.

Specifically, government grants whose primary condition is that the Company should purchase, construct or otherwise acquire non-current assets (including property, plant and equipment) are recognised as deferred income in the statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

**3. Critical accounting estimates and judgements**

The preparation of the financial statement requires the management to make estimates, approximate evaluations and judgements, which affect the value of the reported assets and liabilities, and the declaration of conditional assets to the reporting date, as well as the reported profits and losses for the period.

The uncertainties, related to the judgements made and approximate evaluations could lead to factual results, which would require essential corrections in the carrying amounts of the respective assets and liabilities in future subsequent reporting periods.

**Estimates and judgements**

The main judgements, related to future and other main sources of uncertainties in the approximate evaluations at the date of the balance sheet where a significant risk leads to essential changes in the carrying amounts of the assets and liabilities in the subsequent period exists, are pointed out below:

- Contingent liabilities related to concession arrangement

Management considers the risk of outflow of resources embodying economic benefits in relation to possible determination of non-compliance with concession obligations. There is a risk of contingent liabilities until the Grantor confirms the total fulfilment of the concession obligations of the Company.

- Criteria for capitalization of concession fees and commissions related to concession acquisition.

The Concession commencement date occurred on 19 April 2021, when the Company effectively paid the upfront concession fee under the concession agreement. As of that date, the Company recognized intangible assets related to the paid upfront concession fee and the obligation for payment of minimum annual concession fees under the Concession Agreement.

At the concession commencement date, the Company has also recognized intangible assets for the capitalized costs related to services for the fulfilment of necessary conditions for concession commencement and other costs inherent for the project and the start of the concession. Additional information is presented in note 8.2.

Based on the developed financial model for the Concession, the management has concluded that the above capitalized costs are recoverable through future profits from the project.

- Criteria for distinction of public assets
- The Company defines the property rights in accordance with the Property Act, the State Property Act, the Concessions Act and the Concession Agreement it has signed. According to Article 77 of the Property Act, the property right may be acquired by legal transaction, prescription or other means provided by the law. Except as provided in the Concession Agreement and the Concession Act, assets purchased by the company become property of the company. SOF Connect is legal entity, subject of private law, hence the property belonging to it is private property. If materials and equipment purchased by SOF Connect are applied for the construction or improvement of building and other assets permanently connected to the territory of Sofia airport, on the grounds of Art.92 of the Property Act they follow the property of the land and become public state property. Respectively, when movable assets purchased by SOF Connect are incorporated in the movable assets that are public state property as element to main asset in such a way that they could not be detached without materially damaging the main asset, then on the grounds of Art. 97 of the Property act they will follow the property of the main asset and will become public state property. Determination of transaction price

The transaction prices in respect of construction and upgrade services provided by the Company under the Concession Agreement is determined based on the actual costs incurred by the Company to fulfil the construction and upgrade services plus a margin (surcharge) of 0%.

- COVID19 pandemic impact and going concern

The global spread of COVID-19 and its related restrictions halted the sustained growth in air traffic in recent years. The pandemic proved to be a huge challenge for the airlines and airports, and in 2020-2021 Sofia Airport reported a steep decline in passengers' traffic and operated flights compared to the pre-pandemic period. Nevertheless, in 2023 traffic is recovered and reached 7,208,987 passengers and 60,651 flights, which is 1.4% growth and -1.3% reduction of 2019 levels, respectively. The positive trend continued in 2024 when traffic increased further, reaching 7,922,702 passengers and 65,764 flights, which is respectively 11.5% growth and 7.2% growth of the 2019 levels.

As traffic catches up the pre-pandemic levels, the Company has seen its operating revenues and cash inflows increase. At the same time, the Company manage to keep its operating costs under control, which has resulted into growing EBITDA levels and positive net cash flows from operations. While the Management remains vigilant for potential increase in the number of COVID19 cases in Bulgaria and in Europe, it is of the opinion that COVID19 does not represent a threat for the ability of the company to continue operating as a going concern.

**3. Critical accounting estimates and judgements (continued)**

Furthermore, on 9 April 2021, the Company and the Ministry of Transport and Communications have signed an annex to the concession agreement, postponing the payment of the annual concession fees for a period of ten years and thereby restoring the economic viability of the concession project. The Company has secured sufficient funding from both shareholders and lenders to support its investment plans and provided for day-to-day operations.

- **Ukraine-Russia military conflict and going concern**

The military conflict between Ukraine and Russia started in February 2022. While it poses significant threat to the stability in the region, the demand for flights from and to Sofia airport does not appear to be affected by the conflict. Before the start of the conflict, traffic to/from Russia and Ukraine accounted for only 3% of the overall traffic at Sofia Airport, so consequently, the impact on the operations of the Company has been limited. Therefore, the Management assesses that the Ukraine-Russia military conflict does not have a material impact on the Company and its ability to continue operating as a going concern.

**Deferred tax assets**

The Company has carried forward a deferred tax asset at the amount of BGN 121 thousand related to accumulated tax losses from previous periods, which was utilized in full as at 31 December 2024.

Furthermore, the Company has recognized a deferred tax asset at the amount of BGN 12,518 thousand (31 December 2023: BGN 10,277 thousand) related to the application of the thin capitalization regime for financial expenses under the corporate income tax law in Bulgaria. The thin capitalization regime regulates the interest expenses and bank fees that can be deducted for tax purposes in the period in which they occur. The disallowed portion of the interest expenses and bank fees could be utilized against tax profits in subsequent periods, subject to fulfilment of certain criteria. In accordance with the existing tax legislation in Bulgaria, there is no specific deadline for utilization of the interest expenses and bank fees that have been disallowed for tax purposes in the current financial year. Management has estimated that the full amount of interest expenses and bank fees will be eventually utilized in subsequent tax periods and, therefore, has recognized a deferred tax asset equal to 10% of the disallowed interest expenses and bank fees.

As of 31 December 2024, the Company has recognized deferred tax asset at the amount of BGN 1,328 thousand (BGN 1,183 thousand as at 31 December 2023), originating from temporary tax differences associated with retirement benefit obligations, unused paid leave obligations, accruals as well as impairment of receivables. Based on the current business plans and budgets, the Management has concluded that the deferred tax assets will be fully utilized in the subsequent reporting periods.

**Provisions**

Whether a provision or contingent liability is recognized or disclosed in the financial statements is dependent on a number of assumptions and judgments being made by the management. A provision is recognized when the Company has a present obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Contingent liabilities are not recognized because their existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

**Impairment of tangible and intangible assets**

The Company tests annually whether tangible and intangible assets have suffered any impairment. The ability of tangible and intangible asset to generate sufficient future economic benefits to recover its carrying amount is usually subject to greater uncertainty. In performing these assessments of recoverable amount, a significant number of estimates and judgments are required including but not limited to:

- An estimate of future cash flows expected to derive from these assets,
- Expectations about possible variations in the amount or timing of those future cash flows,
- The time value of money represented by weighted average cost of capital (WACC),
- Perpetual growth rate in traffic.

As of 31 December 2024, the Management has tested tangible and intangible assets for impairment and has concluded that the carrying value of these assets does not exceed their recoverable value, hence no impairment has been recorded.

The recoverable value of the tangible and intangible assets has been calculated by discounting the future free cash flows to the firm over the remaining term of the concession at the current weighted average cost of capital (WACC). To estimate the future free cash flows, the Management have used a number of assumptions concerning the future traffic at the airport, the evolution of the airport charges and the commercial revenues per passengers, the evolution of payroll and other operating expenses.

**3. Critical accounting estimates and judgements (continued)****Impairment of tangible and intangible assets (continued)**

In annual impairment test of tangible and non-tangible assets the traffic for the period 2024-2026 represents the management's best estimate and projections. The traffic after 2026 until the end of the concession agreement has been estimated by an independent professional traffic advisor, based on an industry-accepted methodology. The airport charges for the period 2023-2027 have already been set and have become effective and, therefore, have been used in calculating the free cash flows to the firm. The airport charges beyond 2027 have been forecast based on the expected development of the regulated cost base of the Company, taking into account the Company's investment commitments under the concession agreement, while providing for an appropriate return on capital. Commercial revenues per passenger have been forecast assuming a gradual convergence to the revenue per passenger of comparable international airports. Operating expenses and payroll costs are forecasted based on macroeconomic drivers (e.g. projected consumer price inflation), also taking into account the projected evolution in traffic and the various initiatives foreseen in the Company's strategic plan.

The recoverable value of tangible and intangible assets has been found to be most sensitive to changes in the weighted-average cost of capital as well as the traffic assumptions. An increase of the WACC by 0.25 percentage points and 0.5 percentage points compared to the base WACC, results in a decrease of the recoverable value of assets by 2.7% (or EUR 22.0 million) and 5.4% (or EUR 43.8 million), respectively, compared to the base estimate. Conversely, a decrease in the WACC by 0.25 percentage points and 0.5 percentage points compared to the base WACC, results in an increase of the recoverable value by 2.9% (or EUR 23.5 million) and 5.9% (or EUR 47.8 million), respectively. The tested WACC sensitivities do not result in impairment of the carrying value of the assets.

A decrease in the forecast traffic over the remaining concession period by 1% and 3% compared to the base traffic forecast, results in a decrease of the recoverable value of assets by 1.2% (or EUR 9.4 million) and 3.5% (or EUR 28.3 million), respectively, compared to the base estimate. On the other hand, an increase in the traffic forecast over the remaining term of the concession by 1% and 3% compared to the base traffic forecast, results in an increase in the recoverable value of assets 1.2% (or EUR 9.5 million) and 3.5% (or EUR 28.4 million), respectively, compared to the base estimate. The tested traffic sensitivities do not result in impairment of the carrying value for the assets.

**Useful lives of assets**

The useful lives of the tangible fixed assets are determined based on the period that the asset will remain available for use to the Company. The estimate is also based on historical experience with similar assets as well as any anticipated technological development and changes in broad economic or industry factors. The appropriateness of the estimated useful lives is reviewed annually, or whenever there is an indication of significant changes in the underlying assumptions.

The tangible fixed assets are depreciated based on the straight-line method.

The useful life of intangible assets related to the concession rights and capitalised expenses related to concession is equal to the period during which the assets are expected to deliver benefits to the Company. With respect to those assets, the period is linked to the contractually defined term of the concession agreement, which is 35 years. Therefore, the useful life of the concession rights and capitalised expenses related to concession is defined to equal the term of the concession agreement.

The concession rights and capitalised expenses related to concession are amortized based on the units of production method, and more specifically based on passenger traffic, the latter being the most important revenue driver. The Management have conducted a sensitivity analysis of the amortization expenses based on traffic, which yielded that a decrease of the traffic in a given year by 1% and 3% compared to the base traffic assumption, will result in a decrease of the amortization expense for that year by 1% and 3%, respectively, compared to the base estimate. Conversely, an increase of the traffic in a given year by 1% and 3% compared to the based traffic estimate, will result in an increase of the amortization expense by 1% and 3%, respectively, compared to the base estimate.

Concession intangible assets are amortized using the unit of production method based on passenger traffic (as outlined above), to the extent that the expected consumption of the economic benefits from the usage of those assets is linked to passenger traffic. When the consumption of the economic benefits from concession intangible assets is not linked to passenger traffic, or when the consumption pattern cannot be reliably estimated, the assets are amortized over their useful live using the straight-line method of amortization.

3. Critical accounting estimates and judgements (continued)

Fair value of derivative instruments through profit and loss

The Company has entered into interest rate swap contracts with several financial institutions to hedge against the risk of EURIBOR rate increase. Under the interest rate swaps, the Company pays a fixed interest and receives floating interest equal to the six-month EURIBOR rate as determined on certain contractually agreed dates. Both the fixed and the floating interest are calculated based on a notional loan principal amount that is closely linked to the outstanding loan principal under the Facility 1 and Facility 2 that the Company has obtained. The term of the interest swap contract equals the maturity of Facility 1 and Facility 2 and the settlement dates equal the interest payment dates under the two facilities.

The interest rates swap is not traded in an active market. The fair value of the interest rate swap is determined using generally accepted market-based valuation technique that use observable market data. The valuation technique used by the Company is based on discounting the future net cash flows from the interest rate swap estimated based on the differential between the floating rate (derived from the most recent EURIBOR curve) and the fixed interest rate. The key input used to determine the fair value of the interest rate swaps is the expected EURIBOR rates on each floating rate determination date, which are derived from the EURIBOR forward rate curve as of the respective reporting date, Any changes in the fair value of the interest rate swaps are immediately recognized through profit and loss.

Financial liabilities under concession agreement

The financial liability under the concession agreement represents the net present value of the minimum annual concession fees payable by the concessionaire until the end of the concession period. The discount rate equals the estimated costs of debt of the Company, applicable at the time of the initial recognition of the financial liability under the Concession Agreement (5.15% per annum).

Employee benefit for retirement

The Company is involved in defined benefit retirement plan. Retirement benefit obligations are measured using the actuarial projected unit credit method based on assumptions such as the discount rate, future increases in salaries, employee turnover and mortality rates. Those obligations may change if assumptions change, most of which are updated annually. Details of the assumptions used and how they are determined are given in Note 13 Employee benefit obligations. The Company considers that the actuarial assumptions used are appropriate and justified in the current conditions. The discount rate used to estimate the present value of retirement benefit obligations equals the prevailing yield of return on first-class corporate bonds that are publicly traded on regulated markets in Bulgaria (3.93% per annum).

## SOF Connect AD

### NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2024

#### 4. Revenue from contracts with customers (continued)

Revenue from operating leases of terminal areas determined by the agreed percentage of sales realized in the rented areas are BGN 31,042 thousand (2023: BGN 21,180 thousand).

The future aggregate minimum rentals receivable under non-cancellable operating leases are as follows:

|                       | 2024         | 2023         |
|-----------------------|--------------|--------------|
|                       | BGN'000      | BGN'000      |
| Within 1 year         | 3,627        | 2,212        |
| Between 1 and 5 years | 3,223        | 1,059        |
| Above 5 years         | -            | -            |
|                       | <b>6,850</b> | <b>3,265</b> |

#### 5.1 Expenses

**SOF Connect AD**  
**NOTES TO THE FINANCIAL STATEMENTS**

For the year ended 31 December 2024

**8.1 Concession rights**

On April 19, 2021, the Company made payment on the upfront concession fee according to the concession agreement in the amount of BGN 550,000 thousand without VAT. At that date, the Company has recognized an intangible asset of the same value, which will be amortized over the term of the concession based on passenger traffic.

For the year ended 31 December 2024 the reported amortization of the asset amounts to BGN 9,592 thousand (2023: BGN 8,749 thousand). The balance sheet value of the intangible asset related to the upfront concession fee as of 31 December 2024 amounts to BGN 520,837 thousand (31 December 2023: BGN 530,429 thousand).

At the concession commencement date, the Company incurred an obligation for payment of minimum annual concession fees for the 35-year duration period of the concession at the total nominal amount of BGN 1,680 million (EUR 859 million). Based on an annex to the concession agreement signed with the Ministry of Transport and Communications, the instalments for the first ten years of the concession are deferred to the last ten-year period of the concession. As of 19 April 2021, the net present value of the minimum annual concession payments, using the applicable discount rate, is recognized both as an intangible asset and the related financial liability to the amount of BGN 573,734 thousand. The intangible asset related to the minimum annual concession fees is amortized based on traffic over the term of the concession. The Company also recognizes the interest expense related to the unwinding of the discount of the recorded financial liability, using the applicable discount rate (Note 6).

For 2024 the reported amortization expense of the intangible asset related to the concession fees is in the amount of BGN 19,598 thousand (2023: BGN 17,876 thousand) and the interest expense related to the unwinding of the discount of the financial liability is in the amount of BGN 30,722 thousand of which BGN 405 thousand relate to unwinding of discount of deferred variable concession fees recognized in 2022, 2023 and2024 (2023: BGN 29,084 thousand of which BGN 198 thousand relate to unwinding of discount of deferred variable concession fees recognized in 2022 and 2023). As of 31 December 2024, the balance sheet value of the intangible asset related to the concession fees is BGN 1,064,149 thousand (31 December 2023: BGN 1,083,747 thousand) and the balance sheet value of the related recognized financial liability is BGN 694,136 thousand of which BGN 15,048 is variable concession fee liability (31 December 2023: BGN 655,917 thousand of which BGN 7,146 thousand is variable concession fee).

Due to the nature of the contractual relationship, the value of the expected cash flows and their distribution over time may change, which will also lead to a possible change in the carrying value of the intangible asset and the related payment obligation. As at the date of these financial statements, Management believes that the estimates made are based on the best available information.

**8.2 Capitalized expenses related to concession**

The following table summarizes the details of capitalized directly attributable costs, including borrowing costs related to acquisition of Concession agreement with Grantor:

**SOF Connect AD**  
**NOTES TO THE FINANCIAL STATEMENTS**

For the year ended 31 December 2024

**8.2 Capitalized expenses related to concession (continued)**

Capitalized expenses, related to concession, are reported as intangible asset, which is amortized over concession term based on passenger traffic. For the year ended 31 December 2024 recorded amortization expense of this intangible is BGN 690 thousand (period ended 31 December 2023: BGN 629 thousand).

The “Initial concession fee” in one with “Minimum concession fees” are presented as intangible asset labelled “Concession rights”. Capitalized costs related to concession agreement, are also reported as intangible asset. Both are amortized over the concession term based on passenger traffic. For the periods ending as of 31 December 2024 and 2023 the recorded amortization expense is BGN 20,288 thousand and BGN 18,505 thousand, respectively.

The following table presents the figures:

|                                       | Concession rights | Capitalized expenses, related to concession |

**12. Derivatives Instruments**

|                                        | 01.01.–31.12.2024 | 01.01.–31.12.2023 |
|----------------------------------------|-------------------|-------------------|
|                                        | BGN'000           | BGN'000           |
| Interest rate swaps – cash flow hedges | 15,446            | 25,290            |

SOF Connect is exposed to a risk of interest rate change due to fluctuations in interest rates. To limit interest rate risk and to comply with the requirements of the loan agreements with the lenders the Company has concluded interest rate hedges for floating-rate loans. The floating-rate payments are exchanged for fixed-rate payments (pay-fixed/receive-floating). Floating rate bank loans are based on 6M EURIBOR interest rates, and the agreed fixed rate markup stands at 0.439%.

As a result of the fluctuations in EURIBOR rates in 2024 the fair market value of the Company's hedging instruments depreciated significantly as of 31 December 2024 with a corresponding negative effect on financial result for the year.

**13. Employee benefit obligations**

The Company operates defined benefit pension plan like Bulgarian regulatory frameworks and Collective Labour Agreement. The level of benefit provided depends on employee length of service provided to the Company. If the employee has worked for the Company more than 10 years and not more than 20 years receives 9 gross monthly salaries at retirement; if more than 20 years – 13 gross salaries. For work length less than 10 years, the benefit is 2 gross salaries. The retirement employee benefit plan is not funded. The Company determines its obligations for payment by actuarial method of projected credit units. Revaluation of the defined benefit pension plan including actuarial gains and losses are recognized immediately in the statement of financial position against a debit or credit of other comprehensive income in the period of their occurrence.

Interest expense is recognized by applying a discount factor to the obligation for retirement. Changes in the latter are recognized in profit or loss for the period.

The Company has made estimation for retirement benefits based on actuarial assumptions.

| Wage growth                   | 7.00%            | 7.00%            |
| Staff turnover                | 13.00%           | 14.00%           |

**14. Financial liabilities, related to bank loans**

The financial liabilities of the Company as of 31 December 2024 include payables under loan agreements signed with a consortium of lenders to secure the financing for the concession project. Bank loan liabilities amount to BGN 405,605 thousand (31 December 2023: BGN 346,449 thousand), comprising BGN 413,351 thousand of loaned principal (31 December 2023: BGN 349,518 thousand) and BGN 68 thousand of accrued interest (31 December 2023: BGN 143 thousand), net of BGN 7,814 thousand of capitalized bank fees (31 December 2023: BGN 3,211 thousand). As of 31 December 2024 current portion of non-current bank loans is BGN 14,854 thousand (31 December 2023: BGN 3,532 thousand).

During the reporting period ending 31 December 2024 and 2023 mandatory bank fees were accrued in relation to regular administering of the loans and to commitment fees due on unutilized amounts from Facility 2 and Facility 3. As of 31 December 2024, and 2023, all accrued liabilities related to bank fees have been paid.

As of 31 December 2024, as result of the full disbursement of Facility 2 and Facility 3 all related bank fees have become part of the amortized cost of the respective facilities.

As of 31 December 2023, the Company has BGN 5,801 thousand bank fees relating to Facility 2 and Facility 3 that became part of the amortized cost of respective facilities once these were fully disbursed in 2024.

| <b>Capitalized bank fees for committed bank loans:</b> | Facility 2   | Facility 3   | Total        |

| Societe Generale                                     | 48,309         | 29,924         | -              | 3.50 + 6 m Euribor | 2027                   |
| Unicredit Bulbank AD                                 | 48,309         | 29,924         | 72,839         | 3.50 + 6 m Euribor | 2027 / 2021 (VAT Fac.) |
| DSK Bank AD                                          | -              | -              | 37,161         | 2.00 + 6 m Euribor | 2021                   |
| <b>Total Commitments</b>                             | <b>332,490</b> | <b>136,908</b> | <b>110,000</b> |                    |                        |

The International Finance Corporation joined the financing facilities during 2021. The interest due is covered with a hedge up to 80% of the interest due.

On July 12, 2021 the European Investment Bank also joined the group of lenders. Without changing the total commitments under the loan agreements, a Facility 3 was installed in the amount of BGN 78,233 thousand. The repayment term of the loan from the European Investment Bank is 30.12.2040 and the interest spread is 2.3% over 6 m EURIBOR.

**SOF Connect AD****NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31 December 2023

**14. Financial liabilities, related with bank loans (continued)**

The interest rate for Facility 1 and 2 is also defined as a spread over the 6m EURIBOR rate. According to the financing agreements with the Company's lenders, for Facility 1 and 2 the spread is equal to 3.00% per annum for the first two years of the financing agreements, then increases to 3.25% in the third year, to 3.50% in the fourth and the fifth year and, finally, to 3.75% per annum in the sixth and the seventh year of the financing agreements. Thus, the spread of 3.50% was applied in 2024.

The Company utilized the full amounts of Facility 1 and the VAT Facility in 2021. The VAT Facility has been fully repaid in 2021 and is no longer outstanding. In 2023 the Company made partial utilization under both Facility 2 and Facility 3. In 2024 SOF Connect fully utilized all available amounts under both Facility 2 and Facility 3.

During 2024, Facility 2 and Facility 3 have been fully disbursed but not effectively spent on eligible investment projects. In accordance with the terms of the financing agreements, the unspent portion of the disbursed bank loans was placed in a capital expenditures and maintenance reserve account (CMRA), a special-purpose bank account. As of 31 December 2024, the available funds under the CMRA stand at BGN 148.0 million (EUR 75.7 million). The funds will be used by the Company exclusively for financing eligible projects under the investment program in 2025 and 2026.

The following pledges are established by the Company in favour of the lenders consortium to secure its liabilities:

| <b>Type of security (Pledgor)</b>                                                                    | <b>Subject</b>                                                                                                                                                                     | <b>Notes</b>                                           |

| German Law Account Pledge Agreement (SOF Connect)                                                    | Accounts pledge agreement in respect of the balances on Offshore Accounts                                                                                                          |                                                        |

In 2024 SOF Connect complied with all debt covenants subject to monitoring in that period. Receivables Pledge Coverage Ratio stood within the required range and was no less than 85% of the total amount of present and future receivables of SOF Connect from airport charges, commercial revenues, and Concession subcontracts.

In accordance with the signed Common Terms Agreement (CTA) between the Company and the lenders, in June 2024 SOF Connect started to calculate and report Projected debt service coverage ratio, Historic debt service coverage ratio, and Loan Life Coverage Ratio. All values of those ratios complied with the required thresholds. In 2024 SOF Connect had no obligation to calculate Leverage ratio.

| <b>Financial Covenant</b>                    | <b>Covenant requirement as at 30 Dec 2024</b> | <b>Compliance status as at 30 Dec 2024</b> |
|----------------------------------------------|-----------------------------------------------|--------------------------------------------|
| Historic Debt Service Coverage Ratio (DSCR)  | $\geq 1.20 : 1$                               | Compliant                                  |
| Projected Debt Service Coverage Ratio (DSCR) | $\geq 1.20 : 1$                               | Compliant                                  |
| Loan Life Coverage Ratio (LLCR)              | $\geq 1.30 : 1$                               | Compliant                                  |
| Net Debt to EBITDA ratio (Leverage)          | Not applicable                                | Not applicable                             |

As at the most recent scheduled calculation date (30 Dec 2024), the Company is in compliance with the financial covenants under the CTA. As a result of this, the ability of the Company to continue operating as a going concern is not impacted.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31 December 2023

**14. Financial liabilities, related with bank loans (continued)**

In order to comply with requirements under to the Concession Agreement for providing Operation Guarantee and Performance Guarantee for Works and Mandatory Capital Expenditures, the shareholders of SOF Connect have secured the necessary bank guarantees in favour of the Grantor. The expenses incurred by the shareholders for issuance and availability of the guarantees are reimbursed by SOF Connect. SOF Connect does not provide any security and has no obligations towards the issuing banks in relation to such guarantees.

As of 31 December.2024 the following bank guarantees have been provided to the Grantor:

| Financial Institution                 | Currency | Operation<br>Guarantees<br>Limit | Capital Expenditures<br>Guarantees<br>/Limit |
|---------------------------------------|----------|----------------------------------|----------------------------------------------|
| Banco Bilbao Vizcaya Argentaria, S.A. | EUR      | 38,449,149                       | 5,656,559                                    |
| Societe Generale S.A.                 | EUR      | 10,634,871                       | 1,654,211                                    |
| <b>Total</b>                          | EUR      | <b>49,084,020</b>                | <b>7,310,770</b>                             |

As of 31.12.2023 the following bank guarantees have been provided to the Grantor:

| Financial Institution                 | Currency | Operation<br>Guarantees<br>Limit | Capital Expenditures<br>Guarantees<br>/Limit |

As of each reporting date an analysis of the need for impairment and assessment of expected credit losses is made. The calculation reflects the probability-weighted result, time value of money, as well as reasonable and supportive information available on past events, current conditions, and forecasts for future economic conditions.

In accordance with the term of the financing agreement, the Company is obliged, at any time, to pledge in favour of the lender 85% of its receivables from contracts with clients as well as certain receivable under contracts with suppliers (notably, the contract for cleaning services).

**SOF Connect AD****NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31 December 2023

**19. Shareholder loans (continued)**

As part of the overall commitment of the shareholders to invest equity in the Company in accordance with the Equity Subscription, Subordination and Share Retention Agreement, in the period July 2020 – December 2022 the Company entered into subordinated loan agreements with its shareholders for a total amount of EUR 121,304 thousand (BGN 237,249 thousand). All subordinated loans have identical terms and conditions and have been duly utilized by end of May 2024. The loans bear an annual interest rate of 8.0%. The maturity date of the loan agreements is 30 June 2027. Timing of distributions to shareholders is strictly regulated by the finance agreement with the lenders. First repayments of principal and of interest accrued under shareholder loans as of 30 June 2024 since inception of the loans took place in July 2024 following lenders' formal consent.

The transactions with related parties are settled at contracted prices. The outstanding balances at the end of any of the periods are unsecured, interest-free (apart from loans provided) and their settlement is done with cash or cash equivalents.

**SOF Connect AD****NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31 December 2023

**22.1. Deferred income**

Deferred income arises from capital investments performed by lessees that are not subject to reimbursement by the Company. Since lessees receive the right to use premises the value of investments is considered part of the total rental payments under lease agreements. The value of investments is considered upfront rental payment which is recognized as rental income on a straight-line basis over the contract term.

Deferred income arises also from prepayments for services made by customers mainly related to commercial activities of the Company.

**22.2. Grant financing**

During the year ended 31 December 2024 the Company received a pre-financing payment at the amount of BGN 909 thousand as per a grant agreement related to purchase and installation of energy efficient equipment, which is under construction at year end.

The grant is presented in the statement of financial position as a liability.

The income will be recognized on a straight-line basis over the useful life of the underlying assets after they are put into operation. The project ends in November 2026.

There are no unfulfilled conditions or other contingencies attaching to this grant.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2023

### 23. Commitments, contracts and contingent liabilities

#### Concession agreement

On 22 July 2020 the Company concluded a concession agreement with the Ministry of Transport, Information Technology and Communications of the Republic of Bulgaria regarding the concession of Civil Airport Sofia – a public state ownership for 35 years term. The commencement date of the concession agreement is 19 April 2021.

The main obligations assigned to the Company under the Concession Agreement are as follows:

- to perform all associated functions of airport administration;
- to fulfil investments in the amount of BGN 1,220 million (EUR 624 million) as per the Concession Agreement;
- to pay concession fee to the Grantor under terms of the concession agreement and its financial model the higher of two amounts – the amount of 32% from revenues or agreed minimum annual fee of BGN 48.0 million (EUR 24.5 million);
- to maintain a license for an airport operator, as well as additional licenses and permissions, related to the activities of an operator;
- to employ certain technical and security officers to ensure the safety and the continuity of the operations;
- to fulfill certain environmental plan regarding its operations;
- to attract and maintain own capital to the amount of at least BGN 200 million;
- to construct and put in operations a new passenger terminal (Terminal 3) no later than the end of 2030.
- to prepare feasibility studies for the construction of a second runway every five years;
- to employ and join to the concession contract a third party – an airport operator;
- to provide a bank guarantee for construction works, based on five-year investment plans before the commencement of any construction work;
- to provide an ongoing operational guarantee by an approved bank;
- to present an approval of the Bulgarian Commission for Protection of Competition;
- to sign a contract with lenders and guarantee all the clauses are met, etc.
- at the end of the Concession Period, to return to the Grantor all state-owned assets, including state-owned assets that have been acquired or constructed during the Concession Period. Furthermore, at the end of the Concession Period, the Company has the obligation to offer to the Grantor to lease or purchase the privately-assets owned by the Company, but required for the operations of the airport (referred to as Movable Assets). The purchase or lease price of the Movable Assets is to be assessed through an independent valuation.

For the first five years of the concession, the Company initially committed to invest a total of BGN 84.1 million (EUR 43 million).

In April 2023, the Company proposed update of the Five-Year Investment Plan, increasing the overall investment commitment to BGN 143 million (EUR 73.1 million). This update was approved by the Grantor in June 2023. In November 2023, the Company provided another amendment of the Five-Year Investment Plan, which the Grantor has approved in November 2024. While the most recent amendment preserves the total investment commitment at BGN 143 million (EUR 73.1 million), it reflects the actual progress of the investment projects addressing several amendments in the execution schedule and introduces new investment projects.

| % implementation                                   | 149%  | 113%   | 111%   | 110%   | -      | <b>76%</b>    |

The actual investments for the year 2024 reported to the Grantor encompass capital investments of EUR 24,652 thousand, advances for non-current assets paid to suppliers EUR 1,415 thousand and operating expenses of EUR 1,615 thousand.

According to the Concession Agreement, if the Company fails to implement the five-year investment plan, it has to pay a penalty to the Grantor equal to 10% of the investments that have not been implemented. Management estimates that the Company will be able to realize and even exceed of the target investment BGN 143 million (EUR 73 million) until the end of 2025.

**23. Commitments, contracts and contingent liabilities (continued)**

As of the end of the reporting period, the Company has entered into several contracts for capital expenditures. As of 31 December 2024, the contracted capital expenditures, which are not recognized as liabilities amount to approximately BGN 66.4 million.

During 2024, the Company was following its obligations under the Concession agreement in the below areas:

- performed all associated functions of airport administration;
- reported BGN 54,141 thousand of investments under the approved 5-year investment program in accordance with the Concession Agreement;
- submitted a concession fee certificate to the Grantor, in accordance with which the annual concession fee for 2024 amounts to BGN 74,945 thousand (EUR 38,319 thousand);
- maintained a license for an airport operator, as well as additional licenses and permissions, related to the activities of an operator;
- maintained a Ground Handling Operator licenses according to article 48e paragraph 3, points 3-7 of the Civil Aviation Act;
- ensured that all Ground Handling Activities are provided at the Airport, with the activities being performed both directly by the Concessionaire and by Third Parties;
- employed technical and security officers to ensure the safety and the continuity of the operations;
- invested own capital in the form of shareholder equity and shareholder loans with balance sheet value as at 31.12.2024 to the amount of BGN 445,227 thousand (31 December 2023: BGN 375,616 thousand);
- employed a third party – a reputable airport operator;
- provided a bank guarantee for construction works, based on the five-year investment plans, as well as performance guarantee, in accordance with the concession agreement;
- secured BGN 469 million of bank financing for the project, which has been fully utilized as at 31 December 2024 (31 December 2023: BGN 349,5 million);
- was compliant in fulfilling major part of its KPIs;
- followed obligations for vehicle fleet maintenance, security equipment maintenance, maintenance of buildings, installations and equipment, followed the submitted Maintenance and renewal plan; maintained all insurance policies required by the concession agreement;
- submitted an updated 5-year investment plan to the Grantor;
- maintained a register of Movables required under Clause 6.2 of the Concession Agreement;
- applied, at its own expense, the principle of technology scouting to take advantage of any significant technical improvements or technological upgrades in connection with the Airport;
- carried out and ensured the availability of the Airport Activities and Airport Services in accordance with the Concession Agreement, increasing the competitiveness and quality of the Airport Services in strict compliance with international regulations and standards.

The Concession Agreement for the operation of the airport fall under the application of IFRIC 12.17 and is recognized according to the intangible asset model, since Company receives the right to charge airport users (airlines and passengers) in exchange for the obligation to pay concession fees and provide construction and upgrade services. In accordance with IFRIC 12, the Company reports an intangible asset initially measured as the sum of the upfront concession fee paid by the Company plus the present value of all minimum annual concession fees, that are not variable and are payable until the end of the Concession period, discounted at the applicable cost of debt (Note 8.1). In addition, at the commencement of the Concession Agreement the Company capitalized certain directly attributable expenses related to the Concession Agreement (Note 8.2). Both intangible assets are amortized using the units of production method based on the passenger traffic over the Concession Period. Please refer to the Summary of Significant Accounting Policies for further information on intangible assets.

The rights to use the state-owned infrastructure received as consideration for construction and upgrade services are recognized at the cost of production in the period in which costs are incurred (Note 8.3). Revenue and expenses from construction and upgrade services are recorded pursuant to IFRIC 12.14 and in accordance with IFRS 15.

During the reporting period Addendum 2 to the Concession Agreement was signed through which the Company obtained the right to operate certain state-owned land plots located within the concession territory.

## SOF Connect AD

### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31 December 2023

#### 23. Commitments, contracts and contingent liabilities (continued)

##### Equity and loan agreements

On 24 December 2020 the Company entered into an Equity Subscription, Subordination and Share Retention Agreement, concluded between the Original shareholders and several banks as lenders of the project. The agreement was designed to ensure the achievement of the capital structure, required by the concession contract and ensuring the operations. Under the terms of the agreement, the shareholders committed to provided BGN 469 million to the Company in the form of capital and shareholders' loans.

##### Common terms agreement

On 24 December 2020 the Company signed a Common Terms Agreement with certain banks as lenders and financial agents of the project. The Company attracted a total commitment of BGN 579 million (including a VAT loan, which has been repaid in 2021) in the form of an investment and VAT loan from the lenders. The loan facilities were designed to ensure the fulfilment of the Company's financial commitments under the Concession Agreement.

##### Technical service agreement

On 23 December 2020 the Company signed a Technical service agreement with an experienced and reputable European airport operator. The airport operator provides advisory and other services to the Company in relation to the airport operations.

##### Legal claims

As of the reporting date, the Company is a defendant under several labour-related and commercial legal cases. The estimated maximum total claim against the Company under those legal cases amounts to BGN 153 thousand as of 31 December 2024 (2023: BGN 111 thousand).

##### Bank guarantees

As at 31 December 2024, in accordance with the terms of the concession agreement, the shareholders have issued to the Ministry of Transport and Communications on behalf of SOF Connect AD bank guarantees for construction works, based on the five-year investment plans, amounting to EUR 7,311 thousand (BGN 14,299 thousand) (31 December 2023: EUR 7,311 thousand or BGN 14,299 thousand) as well as performance guarantees amounting to EUR 49,084 thousand (BGN 96,000 thousand) (31 December 2023: EUR 49,084 thousand or BGN 96,000 thousand).

The Company has issued operating bank guarantees to third parties to the amount of BGN 600 thousand as 31 December 2024 (31 December 2023: BGN 600 thousand).

| Financial Institution                 | Currency | Operation<br>Guarantees<br>Limit | Capital Expenditures<br>Guarantees<br>/Limit |

**23. Commitments, contracts and contingent liabilities (continued)****Contingent liabilities**

In accordance with the concession agreement, the Company has undertaken several obligations, not only related to operation of the public airport, but also related to capital investments, maintenance, and modernization. The performance of these obligations is carried out in accordance with investment plans approved by the Grantor for the airport. The approved investment plan for the first 5-year investment period as amended amount to BGN 143 million (EUR 73.1 million). In accordance with the concession agreement, in case of non-fulfilment of the proposed investments, the Company shall be obliged to pay to the Grantor a penalty in an amount corresponding to ten percent (10%) of the value of the proposed but not realized investments at the end of a five-year review period. As of the reporting period end date, Management estimates that the committed investments under the 5-year investment plan will be successfully implemented, therefore, no provision for potential penalties have been accrued.

In the course of fulfilment of these obligations, various limitations may arise which may give rise to their incomplete or timely fulfilment. Often these limitations are beyond Company's management control and depend on the regulatory environment in which the Company operates or depend on specific measures and actions that should be undertaken by the grantor.

The fulfilment of the investment and operating arrangements is under the control of, and is confirmed by the state, as a grantor of the concession infrastructure.

As at 31 December 2024 and 2023 the Company has an off-balance sheet credit line with a limit of EUR 5 million for servicing hedging instruments.

**24. Financial risk management**

The Company's activity is exposed to a number of risks, including price risk, currency risk, interest rate risk, credit risk and liquidity risk. The Company management monitors overall risks and implements measures to limit the possible negative effects of risks on its financial performance.

The financial risk management is performed by the Finance department of the Company. The department assesses and monitors financial risks in close collaboration with management. The activities implemented to reduce financial risk aim at covering specific areas, such as price risk, currency risk, interest rate risk, credit risk and liquidity risk.

*Price risk*

The price risk is evaluated by Management in the context of expected future revenues from the operating activities of the Company.

One of the price risks for the Company is related to the unit level of airport charges, which in accordance with the Civil aviation act and the Regulation on airport charges for the use of public airports and air navigation services, are set at their cost-recovery levels. In case of appeals from airlines, the Regulatory authority - the Director General Civil Aviation Administration (DG CAA) - has the right to set the regulated airport charges application at a level that is different from the one proposed by the airport operator.

The regulated airport charges at Sofia Airport have been fixed for the period 2023-2027, thus substantially reducing the price risk related to regulated operations. This long-term pricing strategy provides long-term visibility on airport charges to airlines, and allows them to better plan their operations, and also allows the airport operator to recover the COVID-19 induced financial deficit by spreading the financial burden over five years, as opposed to just one year.

The Company faces price risk related to ground handling services prices. There are three main ground handling operators on the ground handling market at Sofia Airport, creating a highly competitive environment. At the same time the Company faces increasing cost of ground handling services due to the increase in prices of materials, electricity, fuels, consumables and labour. Furthermore, the Company's revenue from ground handling services is subject to concession fee under the Concession Agreement, which puts SOF Connect at a disadvantage compared to the other market players, which are not subject to such a requirement. As a result, the ground handling prices cannot be set at their optimal levels, leading to negative profitability from the ground handling activity. SOF Connect has taken measures to reduce the losses by terminating loss-making ground handling contracts. This has resulted in reduction of SOF Connect's share in the ground-handling market from 20% in 2023 to 17.3% in 2024.

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31 December 2023

**24. Financial risk management (continued)**
*Interest risk*

The Company makes proper financial planning in relation with the loans it received. The loans from related parties bear a fixed interest rate and do not expose the Company to any interest rate risk. As the interest rate on bank loans comprises of a margin above EURIBOR, the Company uses interest rate swap contracts to hedge the risk of increase of the EURIBOR rate.

*Liquidity risk*

Liquidity risk is related to the inability of the Company to meet its obligations when they become due. To manage long-term liquidity risk, the Company has secured medium and long-term financing from banking institutions, as well as from its shareholders to cover its liabilities under the Concession agreement. The short-term liquidity risk is managed by daily monitoring of the current receivables and payables of the Company.

The effective management of the liquidity of the Company assumes provisions of sufficient working capital.

As at the reporting dates, the maturity structure of the financial liabilities of the Company, on basis of the contracted undiscounted payments, is shown below:

**As of 31 December 2024**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

For the year ended 31 December 2023

**24. Financial risk management (continued)**
*Currency risk*

The Company performs a major part of its transactions related to purchases, sales and loans in BGN and EUR. Since the EUR and the BGN have a fixed exchange rate of EUR 1 for BGN 1.95583, the Company considers its currency risk low. Only an insignificant part of the Company's transactions is performed in other currencies.

*Credit risk*

The credit risks to which the Company is exposed are related to incurring of financial losses due to a default by a client or a supplier, or bankruptcy of financial institutions in which the Company holds current accounts or from which it receives financing.

The Company trades only with established, creditworthy counterparties. Its policies are that all clients, who wish to trade on a deferred payment, are to be checked for creditworthiness. Additionally, the balance of the trade receivables is followed regularly, and any clients with overdue trade receivables are proactively requested to settle their debt (including through negotiating of deferred repayment plans). Where practical and feasible, the company requires advance payments or security deposits from clients with poor credit history. As a result of these measures, the exposure of the Company to doubtful trade receivables is relatively limited.

The main credit risk to which the Company is exposed in relation to the provided current accounts in banks. To manage the level of the credit risk, the Company works only with established banks with investment-grade credit rating. At 31 December 2024 the current accounts and the short-term deposits of the Company are allocated in banks with the following credit rating (according to Fitch Agency):

|        | BGN'000 | Credit rating |
|--------|---------|---------------|
| Bank 1 | 3,485   | BBB           |
| Bank 2 | 339,536 | BBB+          |

Credit risk, appearing from other financial assets of the Company, such as, cash and other financial assets, represents the credit exposition of the Company, coming from the possibility of its counterparties not to fulfil their liabilities. The cash transactions of the Company are performed through banks with a good credit rating. In this respect, the credit risk is managed on a Group level with centralized selection and negotiation with banks.

The maximum credit exposition of the Company as a result of the financial assets equals their carrying amounts as of 31 December 2024 and 2023.

For the year ended 31 December 2023

**24. Financial risk management (continued)***Financial risk management in relation to Covid-19*

The Covid-19 pandemic is still affecting the traffic at Sofia Airport. Even if the traffic gradually recovered to its pre-pandemic levels, the traffic is still far from the pre pandemic projections for 2024 and the accumulated loss of passenger is not foreseen to be recovered at medium term. The number of aircraft movements (ATMS) in 2024 were 7.2% above the number in ATMs in 2019, while the number of passengers in 2024 exceed the number of passengers in 2019 by 11.5%.

To cope with the effects of the pandemic, the Company has undertaken several measures, including restructuring of certain internal units and processes, monitoring of daily activities by the senior operations management, outsourcing or sub-contracting certain business activities. Sof Connect has undertaken steps to recover the incurred deficit related to 2021 and 2022 through the airport charges for the period 2023-2027.

In addition, the Company has signed an addendum to the Concession Agreement with the Ministry of Transport and Communications for the deferral of the annual concession fees for the first ten years of the concession, in order to restore the economic balance of the Concession.

*Capital management*

On 24 December 2020 the Company entered into an Equity Subscription, Subordination and Share Retention Agreement, concluded between the original shareholders and several banks as lenders of the project. The agreement was designed to ensure the achievement of the capital structure, required by the concession contract. Under the terms of the agreement, the shareholders committed to provide BGN 469 million to the Company in the form of capital and shareholders' loans.

On 24 December 2020 the Company signed a Common Terms Agreement with certain banks as lenders and financial agents of the project. The Company attracted a total commitment of BGN 469 million in the form of investment loans from banks. The loan facilities were designed to ensure the fulfilment of the Company's financial commitments under the Concession Agreement. A short-term loan to finance the VAT on the up-front concession fee was also utilized by the Company in April 2021 and was successfully repaid later in that year.

As at 31 December 2024 the Company has not declared or distributed dividends.

|                                               | <b>(1,326,020)</b> | <b>(1,171,234)</b> | <b>(1,269,490)</b> | <b>(1,119,115)</b> |

The fair value of the financial instruments of the Company is the amount which would be received from the sale of a financial asset or paid for the transfer of a financial liability in a deal between market players at the date of the evaluation. For the evaluation of the fair value, cash and cash equivalents, related party payables and trade payables are used and is based on the assumption that due to their short-term nature their fair value is close to respective cost.

The Company estimates the fair value of the financial instruments that are measured at fair value in the financial statements using various valuation techniques and inputs. Depending on the reliability of the inputs used in determining the fair value, the Company classifies its financial instruments in three levels as follows:

Level 1 – the fair value of these financial instruments can be derived directly from quoted market prices in active markets (such a public stock exchanges) as of the end of the reporting period. The quoted price used to derive the fair value of the financial instruments is the prevailing offer (bid) price as of the end of the reporting period.

Level 2 – the fair value of financial assets that are not publicly traded and for which no quoted market prices in active markets exist is estimated using commonly accepted valuation techniques, using observable market inputs, available from reputable information platforms such as Reuters or Bloomberg, or similar reliable sources such as investment or commercial banks. If all significant inputs required to estimate the fair value of the financial instrument are derived from such observable and reputable information source, the instrument are classified as level 2.

Level 3 – the one or more of the significant inputs are not derived from observable market data, the financial instrument is classified as level 3.

The fair value of the interest rate swap contracts used by the Company is estimated using a valuation technique based on the present value of the estimated future cash flows based on observable interest yield curves. Therefore, the resulting fair value of the interest rate swaps is included in level 2.

**26. Events after the reporting date**

In March 2025, an amount of EUR 38.2 million has been released from the Ramp-Up Reserve Account. These funds have been used to repay the company loan obligations.

No other significant events have occurred between the reporting date and the date the financial statements have been issued.
