	14.12.22	Could you please clarify on the following questions. 1 The Display requirements ask for 50 and 43 inch displays. In combination with the other requirements (i.e. 16GB of internal storage) 50 inch would not be available, instead we would be able to supply 49 inch displays instead of the 50 inch. Would this be acceptable? 2 If not would this be regarded as a minimum requirement and a 55 inch display would be acceptable? 3 We understand that we are required to provide all necessary server components to be operated by SOF Connect team on premise. Would a hosted solution also be acceptable?	1. Yes 2. N/A 3. Yes	22.12.22
